Version   : 1.03

Copyright 2004 Ari Margo

This is a free document that is not intended for commercial
use. It is free to be distributed FREELY. It may NOT be used
to make money in ANY FORM. I give my permission
for this document to be modified and improved upon in a tasteful
manner as long as my name remains on the document. Most of the
information contained here was either discovered directly
from the game or obtained via one of Konami's Japanese
websites translated through Altavista's Babelfish. I
created this to spare other Pop'n fans the trouble
of deciphering poorly translated Engrish since no other
FAQs were available for this game at the time of writing.
This FAQ was NOT designed to be very in depth. It is
merely to give importers enough information to get the most
out of the game. If you need more in depth information about
the Pop'n Music series in general, there are very detailed
FAQs for other games in the series already available at
GAMEFAQS.

Enjoy.

Table of Contents:

Section 1: Track List

   2. Contact Information

--------------------
--------------------
SECTION 1: TRACK LIST
--------------------
--------------------

The list below contains all the songs in the game.
It does NOT provide the real names of the songs, but
the name that you will see when selecting stages, which
```

represents the genre of the music.

Before you begin play, go into the options menu and change
SELECT to SHORT CUT. This will replace the normal Pop'n
Music 4 menu screens with a much more simplified version. It
is unfortunate that we won't be able to enjoy those graphics,
but it is important because in this mode the stage selection
screen is in English instead of Japanese.

Songs with marked with an * are not available by default
and must be unlocked (see secrets section). In addition,
there are specific requirements to play the more
challenging HYPER versions of the songs (once again,
see the secrets section).

```
GENRE              RIVAL            CHALLENGE
                                    (Normal/Hyper)
*STAGE 1*

SECRETS
-------
-------
```

```
-------------------------------------------------
1. HOW TO UNLOCK SECRET SONGS VIA TIME RELEASE
-------------------------------------------------
```

There are 8 Secret Songs in Pop'n Music 4. In order to
unlock them permanently in Arcade Mode, they must be
time released. There is no other way to permanently
unlock them in Arcade Mode. In order to time release
the songs, you must play Arcade Mode. FREE MODE WILL
NOT ADVANCE THE TIMER! The only time the timer
advances is when you are actually playing a song.
Navigating the menus does not count. Watching the staff
roll does not count. Only actual gameplay counts. Once
enough time has elapsed, the secret songs will start
becoming available in Stage 3.

Time Release List:

```
BRITPOP            : 2 Hours
HORROR             : 2 Hours 30 Minutes
POPS M-Mix         : 3 Hours
J-TEKNO M-Mix      : 3 Hours 30 Minutes
DANCE M-Mix        : 4 Hours
BONUS TRACK M-Mix  : 4 Hours 30 Minutes
SPECIAL ENDING     : 5 Hours
CLASSIC 4          : 5 Hours 30 Minutes
```

```
-------------------------------------------------
2. HOW TO UNLOCK SECRET SONGS VIA SECRET CODES
-------------------------------------------------
```

There are also 2 methods of temporarily unlocking all
of the songs. One is through secret codes, and the other
is by meeting specific requirements. When you unlock
the songs in this manner, they will only be available
for 1 game in arcade mode, and then they will once again
be locked. However, if you do chose to play the song when
it is unlocked, it will be permanently available in FREE
MODE, whether or not you pass or fail the song. Please
remember though that free mode will not progress the
time release timer to unlock the songs in Arcade Mode.

Because I have not been able to find an accurate translation
of the challenge requirements, I will not attempt to include
them here because there's no point in publishing potentially

```
bad info. If you want to do the challenges instead of doing
the codes, then visit this roughly translated website which
explains how:

http://babelfish.altavista.com/babelfish/urltrurl?
lp=ja_en&url=http://www.konamistudio.co.jp/pm4/p4_news.html

If you don't feel like doing them (as some of them are
VERY difficult), don't feel bad about doing the secret codes
instead. They serve the exact same purpose and are there
to spare you from the challenges.

The secret codes must be performed on the Title Screen
where you would choose a mode. Hold down SELECT and then
enter the code. If you are successful you will hear a
sound effect. Then when you play in Arcade Mode, the song
will be available one time only in Stage 3.

```

```
3. High Speed
-------------

If you want the notes to scroll down the screen faster, such as a
High Speed mode in a Beatmania game, then after selecting ARCADE
MODE, hold down the select button. You can then select between
QUICK (High Speed 1) and TURBO (High Speed 2) using the Blue Buttons.

--------------
4. Hyper Songs
--------------

In order to play Hyper Songs, you must first play every song in the
game at least once. It does not matter if you pass or fail.  Then,
if a hyper version is a available, while picking a stage, hold down
the select button while choosing. The following songs have Hyper
versions:

COQUETTISH
PASSION
BOOGIE
KARAOKE
OKINAWA
NUDY
PRELUDE
CLASSIC 4

-----------------
5. Instant Give-up
-----------------

If for whatever reason you decide that you want to quit playing a
song before it is over, just press start and select.

SECTION 3: Closing
-----------------
-----------------

---------------------
1. Version Information
---------------------

1.00 : First Version
1.01 : Added contact information and corrected spelling errors.
1.02 : Konami changed the address of the Pop'n site, so I updated the URL.
1.03 : Fixed a typo. ...yes, just a single letter.
