+   SaGa Frontier Bestiary/Enemy Listing   +
+                   By Malinor             +
+++++
```

Alright all you readers out there, this is my first FAQ, so hopefully things will run as smoothly as they should. I decided to create this FAQ on a bit of a whim when I checked the SF board at random one day, and saw another revival of interest in what has always been one of my favorite games. Despite all the in-depth information that can be found, I realized that there had still yet to be a guide on all the foes and beasties you face throughout this game, so I decided to make one.

That said, this is just my first "edition" so to speak, which contains all the basic information that people usually want when looking at enemies, statistics, skills, items dropped, weaknesses, etc. In the future, I intend to add individual defense stats for all enemies, which will require searching through a lot of hex, as well as a hopefully complete list of where most enemies can be found at any given point of the game.

```
+++++
+                   Version Info           +
+++++
```

June 10th, 2007 - Version 1.00 info compiled and written

June 11th, 2007 - Version 1.01 Pulled FAQ before it was posted to fix numerous spelling errors as well as some "trailing spaces". Also added a few asthetic touches.

Future version to hold defense statistics, locations, and likely anything else requested of me.

```
+++++
+                   Contents               +
+++++
```

I've decided it best to divide the creatures in the game by type, and then by rank, as best as it could be done. Rank 1, followed by Rank 2, then 3, and so on. After words are the unranked enemies of the same type, then the next type. To explain the info, see here:

Rank # - Name - Type

Skills:

Status:

HP -

STR -

QUI -

INT -

WIL -

PSY -

VIT -

CHA -

Resistances:

Mystic Absorb:

Mystic Sword -

Mystic Glove -

Mystic Boot -

STR + 0

QUI + 0

WIL + 0

PSY + 0

VIT + 0

CHA + 0

Items received:

Monster Absorb:

Rank--- The game's method of leveling up enemies with you. As you fight battles, your battle rank will increase, and open you up to new, higher levels of enemies. Rank goes from 1 to 9, and is sometimes called tier. Keep in mind that not all enemies are contained within those nine. There are enemies that are labeled as "Superior", which despite being misleading (Superior enemies are often times weaker than their tiered counterparts), I've decided to list as Rank - S. Clear cut boss enemies are also outside the nine, and are labeled as Rank - B, for logical purposes.

Name--- Pretty self explanatory, this is what the creature is called. Due to the fact that I translated a large portion of these from a Japanese site, there may be slight differences, but I hope that these will be caught shortly, and I am skimming through the list myself to be certain.

Type--- This is the organization of monsters within the game, it goes along with Rank. Types include things like Birds, Giants, Undead, etc. Once again, however, some enemies are exceptions to this rule, and are given no classification by the game. In the case of these monsters, I've tried my best to reason what they should be, and labeled them as such.

Skills--- This is a mostly complete list of all skills and attacks that said enemy can use against your party, or for his own.

Status--- Just a heading for the stats of the enemies for organizational purposes. The effect of some stats are still argued, so some information written here could be incorrect.

HP--- Health Points, the amount of damage this particular enemy can handle before it dies. This game uses a unique setup for event and boss battles though, which will be explained later, but keep this in mind as numbers seen for bosses might not be what you're really up against.

STR--- Strength, determines the amount of damage said monster does with physical attacks.

QUI--- Quickness, determines when a monster takes his turn during the fight, also affects dodge rate.

INT--- Intelligence, likely determines some amount of spell and ability damage, not completely known.

WIL--- Will, or willpower, has some bearing on the length of status

effects on said enemy.

PSY--- Psychic, also likely determines spell damage, as well as damage taken from spells.

VIT--- Vitality, higher vitality reduces physical damage, and possibly shortens status effects.

CHA--- Charm, only known use is to increase the effect of healing based spells.

Resistances--- This is how it's labeled, as far as I know, but is a little misleading. For the most part, this shows what said monster is strong against. However, in the case the Undead and Mecs, it simply labels them as such, and means that they can be affected by Undead and Mec only skills, respectively. Also shows if the enemy has a shield.

Mystic Absorb--- Heading for the three mystic only skills. When said monster is killed by Mystic Sword, Mystic Glove, and Mystic Boots respectively, the using mystic will gain the listed skill, as well as the subheading of stats listed here, added to their own current stats.

Items Received--- These are the items that can be gained from killing said enemy.

Monster Absorb--- These are the abilities that can be gained by having a friendly monster absorb this one after battle. Note that for mecs, it lists the mec skills that can be gained by downloading with a friendly mec.

Hopefully that was an in-depth enough explanation as to what this guide will be putting forth. Without further delay, Malinor's Bestiary Guide! Huzzah!

And thus ends Malinor's Bestiary Guide! Huzzah!

-----Contact Info-----

For questions, comments, suggestions, concerns, corrections or any other sort of thing, you can feel free to reach me at:

Aaromier, on AIM
or
Malinor@gmail.com

-----Special Thanks-----

Thanks to CJayC, for starting what I consider to be the best gaming site.

Thanks to uri.sakura.ne.jp for hosting mostly correct info for almost anything regarding this game.

Thanks for the SF GameFAQs board for continuing to pursue this game and all knowledge of it.

Thanks to SteveO 528, of the above mentioned board, for assisting in the translation, and saving me hours of testing.

And of course, thanks for Square for (partially) making this amazing game in the first place.
