## ACKNOWLEDGEMENTS

Thanks to these sierra hotel persons/organisations:

- Ueda Masami (Weapon) of Japan, for the consumer game  
urawaza database HP.

## HIDDEN COMMANDS

- Increase heroines' Kouji.

Plug in three or four controllers. Start a three- or  
four-player game.

During another player's turn, repeatedly tap the  
Square button on your own controller.

A random heroine's Kouji (favour, friendliness,  
goodwill) towards your chara increases by 1.

If your controller has an auto-repeat function, turn  
it off and manually tap the Square button.

If the auto-repeat function is on, this trick doesn't  
work.

Each heroine's maximum Kouji is 999.
