Tekken 3 © Namco

For King use these moves to beat people easily:

Key: rp=right punch lp=left punch
rk=right kick lk=left kick

Full-Nelson Backbreaker>Scoop Slam>Power Slam>Toss

- 1: Start by pressing side step rp+rk -or- holding down-towards rp-lp (this should make king wrap his opponent around his back and lift him if he catches him under the sholder see next combo)
 - 2: Press rp rp rp+lp repeatedly until king has his opponent fully on his back
 - 3: Press lp rp lk+rk repeatedly until king has his opponent fully above his head
 - 4: press rp lp lk rk until king has grabbed his opponents leggs after that he will finish the job himself
- *this combo takes 70-85% of your opponents life

High Angle Suplex>Powerslam>Toss

Start like you would the first combo, this combo is actually a counter so if your opponent was attacking when you grabbed him as indicated in the first combo this will be done. King will Catch his opponent under his sholder, immedately start doing #3 from the previous combo and follow it to the end.

*this combo takes 40-65% of your opponents life

Deadly boomarang

This move is actually on kings moves list but most people underestimate its power. during sidestep press lk+rk

*this move takes 30-55%of your opponents life

Ali Kicks

hold down and press lk+rk repeatedly until king stops kicking. He will kick either 3 times and his opponent will stagger, or 5 times and your opponet will fall. If kings opponent falls do it again

**note all of these moves work in tekken 2 3 & TAG

i dont know about 1 but try it and find out. If you use king in tekken TAG Eddy/TIGER is a good tag partner for him
