Tomb Raider 2

In depth walkthrough on enemys by percy boi

percyboi@hotmail.co.uk

Let start the show...yeah!?

Version History

1.0 I have completed my guide with all the enemys,cheats and bosses revealed

1.25 I have confirmed and corrected a massive mistake

1.30 I have added my email address to the party

1.35 I have added my new email address

Introduction to guide

This guide you are reading is the key to defeating all enemys to Lara croft's Tomb raider 2. The enemys will be divided into two sections (one is bosses the other is enemys). I will include in each enemys file(looks,attacks,best way to kill and where this enemy is found).

Introduction to the game (This is from my own knowledge of the story.)

Hundreds of years ago in Anicent China, The emperor found a knife that if plunged into your heart you would have ultimate power. With this he was feared around the globe as the most powerful man on earth (what a job). But, the world did'nt like this idea and rebeled against China in one final battle near The great wall. After China was defeated, the world placed the knife deep in a tomb and no one saw it again. In the present day the Italian gangster Bratoli has a strange intrest in the daggar but the explorer lara croft wants the daggar aswell. Your character is Lara croft and the baddie is Bartoli. So let the race for the knife begin.

Words of Notice

I have some things to say about this walkthrough. Firstly, if this has affected you in anyway then email me, if it has helped, enraged or anything else to you then I want to hear about. If you spot a mistake, chat or even offend me then lets talk you loonies. Secondly, if you would like to use my information in this walkthrough then I expect credit in the FAQ made and an email about it. I would not want to give you a booking in court for copyright now would I?

Contents

1a. Introductions

1b. Words of Notice

1c. Contents- The thing you are reading, dumbass

2. Walkthrough- the main thing

3. Legal stuff

4. About the author/other FAQ's wrote/copyright/thanks

5. The end- don't cry

Walkthrough

The enemys are listed as you encounter them not in alphabetical. If I have missed any enemys please let me know. On the 'found' area of a enemys file the

number means the level it appears on.

Enemys

Name: Tiger

Looks: This creature is orange and black, has four legs.

Attacks: It jumps on you and scratches or sometimes bites.

How to kill: The best way to kill them is to stand from a high platform above and use your pistols to save ammo. If this option isn't available to you then you need a powerful weapon like a shotgun to fire from close range.

Found: Level 1 and 15

Name: Eagle/Falcon

Looks: A brown feathered bird that is always moving in the air.

Attacks: Flies down towards you and pecks your face

How to kill: It rarely attacks you when you are against a wall so its best to use a pistol from this position.

Found: Level 1 and 11,12

Name: Spiders

Looks: Black spiders that hide in dark corners

Attacks: Crawl and bite your legs or sometimes swing on webs and jump onto your back

How to Kill: They come in two shapes (big and small). To kill small ones just use a pistol shot from far away. To nail big ones use something accurate like the M16 or shotgun. They also can't climb big rocks so you could shoot them from above.

Found: Level 1, 15

Name: T-REX

Looks: What the hell does a big green T-Rex LOOK LIKE! If you are that dumb please read this?!

Attacks: It has many attacks such as swinging his tail at you, stamping on you and biting you.

How to kill: Pull out your best weapon and stand as far away as possible, then just blast it like hell. If he isn't dead when he reaches you roll so you back is facing him and start backflipping and shooting until you as far way as possible then shoot again. Repeat this sequence until he is dead.

Found: Level 1

Name: Doberman

Looks: A black and orange patched dog.

Attacks: Runs at you really fast and bites you (I hope he doesn't have scabies or nits).

How to Kill: Pull out a shotgun ideally as it takes just one shot to bring it down. Hurry up when doing this because if it is too close you may not get a shot. Like many animals in this game it can't reach high ledges so use pistols to save ammo if you have a shot from above.

Found: Level 1,2,3,4,5,6,18

Name: Italian Gangster

Looks: Dressed in black with a red dragon mark on his chest

Attacks: Carries a sniper or desert eagle. He sometimes shoots from a higher ledge or just shoots you from your level. He is sometimes equipped with a doberman.

How to Kill: The M16 makes a good gun against other people or sometimes Grenade Launcher but only use a grenade launcher if it is absolutely necessary. But it is difficult to shoot someone who is higher than you. Trying just wastes bullets so try to find a ledge above you to have a better shooting angle. If the gangsters are in a pack then use your machine gun or

launcher if you don't have them then you can either die or run away like a sissy. These can also shoot through water.

Found: 2,3,4,18

Name: Rat

Looks: Small crawling black mouse found in dark corners

Attacks: Nibbles your feet

How to kill: Kill it the same way you would a small spider

Found: 2,3,4

Name: Rig worker

Looks: Dressed in overalls, carries a wrench.

Attacks: Surrounds you in a corner and hits you with his wrench

How to Kill: Kill the same way you would an Italian Gangster but the Rig workers weapon is only a spanner

Found: 5,6,7,8,9,10

Name: Rig Guard

Looks: A big man dressed in a black t-shirt.

Attacks: The same way as an Italian Gangster

How to Kill: The same way as an Italian gangster

Found: 5,6,7,8,9,10

Name: Rig Boss

Looks: A big dude with a shotgun and a deadly human

Attacks: He looks tough he is tough. He fires a shotgun at close range really quickly.

How to Kill: These guys are never together and it takes two shots to blow them to pieces with your launcher. If you are lucky you will only have to refill your health with a small medi pack. Don't just run at them with a shotgun keep side jumping and shooting with your M16. The other big factor is luck.

Found: 5,6,7,8,9,10

Name: Frogman

Looks: A man in a scuba kit

Attacks: Fires harpoons with his harpoon gun. Found underwater and only attacks when you are underwater as well.

How to kill: There are many ways to kill frogmen. If you have harpoon with at least three harpoons you can take one down when underwater. They are usually in packs so six or more harpoons are needed. Another way of 'disposing' of them is to go towards them, turn around swim up and down to dodge their arrows, climb out of the water and use your pistols. You can also hear them breathing if they are close by.

Found: 5,6,7,8,9,10

Name: Flamethrower Thug

Looks: A tall fat crap in a white vest and flamethrower on his back.

Attacks: He fires firewaves at you. If he flames you, you will die in three seconds from burns unless you are near water. Try to stay away from these guys.

How to kill: Get as far away as possible from his fire waves and use anything to bring him down. If he is getting close don't stay still. Keep jumping left and right. You will always meet this guy and is not avoidable so be careful.

Found: 6,7,8

Name: Shark

Looks: A dark blue bodied fish, very fast, looks like a great white.

Attacks: Swims towards you and takes a deadly bite and bash

How to kill: Kill this creature the same you would a frogman.

Found: 7,10

Name: Barracuda

Looks: A small version of the shark, very slow

Attacks: Swim towards you and takes and light bite out of your health

How this kill: Kill this creature the same you would a frogman

Found: 6,7,8,9,10

Name: Moray Eel

Looks: A long black snake that pops out of holes underwater, a rare creature because I have only seen it once.

Attacks: Jumps out of hole and takes three quarters of your life. Always have full health when encountering them

How to Kill: It is not possible, I have tried everything. Just avoid them.

Found: 10

Name: Crewman

Looks: Just like a rig worker

Attacks: The same a rig worker

How to kill: Guess, a rig worker

Found: I am not sure but I will be by the next update of this guide

Name: Private Mercenary/ Mercenary boss

Looks: Men with big guns in army suits

Attacks: The boss is just little better than the private. They attack like rig bosses but or even more deadly.

How to kill: These guys come sometimes in packs but a part from that use the rig boss method. Hint: Use the uzi's to shove them off

Found: 11,12,13,14

Name: Snow leopard

Looks: Just looks like a tiger but it's fur is all white.

Attacks: Kills just like a tiger

How to kill: Kill it like it was a tiger

Found: 13,14

Name: Fighting Fish

Looks: A tiny slow fish that trys its best to hurt you, but fails miserably

Attacks: Just bites you really

How to kill: Harpoons underwater is'nt a great way because it is near impossible to kill it as it so small. The best option is to shoot on ground with a pistol shot

Found: 13,14

Name: Yeti

Looks: A big fat white stoned monster with one hand as a fist made of rock

Attacks: Runs at you when in the dark and punches you(this takes about 1/3 of your health). (He's got to be a goodboxer)

How to kill: Use something powerful accept for the M16 as it won't fire when lara is moving. Use my above ledge method that I use on other creatures and you will have no problem.

Found: 13,14

Name: Chinese warriors

Looks: A blue frozen statue when far away, when up close the egg cracks and they fly off. They are dressed like warriors going into battle, they have red armour and white trousers.

Attacks: They fly towards you and stab with a daggar.

How to kill: You can hear them if they are near so just spin until you see them. They are really slow flyers but they do have a powerful attack. Use your pistols to save ammo if they are far away. If they are closer to you then you could use a powerful weapon like a shotgun or launcher but I like to just keep moving

and I always take them down with my pistols.

Found: 15,16

Name: The Daggar protectors

Looks: They are in blue frozen statues far away but up close they dragon men.

Attacks: These are the most deadliest enemies known to man. They are fast and have a deadly attack. They fly towards you and just plain kill.

How to kill: Just use whatever you have got (launcher, shotguns or machineguns) the best thing you have got.

Found: 15,16,17

Name: Ninja

Looks: Dressed in all black

Attacks: Throw blades at you, to avoid them keep moving

How to kill: Kill the same way you would a italian gangster

Found: 15,16,17

There are only three bosses on the game so I though I'd mention em.

Boss 1: Super Italian Gangster

Looks: He looks like an Italian gangster but has big guns and a vest

Attacks: Runs around you shooting you until your dead. So keep moving to avoid this.

How to kill: Use pieces of the terrain to your advantage like boxes and pillars. You can also use my above ledge method. If you are skilled at this game then you may only need a small medi pack to re-fill your health but if new keep a few large packs just in case. About 10 shotgun shells will take him down. If you are quick enough you may also try to run passed him, roll and get out a few shots while he turns around.

Found: Level 4 and 18

Boss 2: The protector of the Talion

Looks: He looks like a big yeti but covered in black.

Attacks: He walks towards you and hits you, stamps on you or somethimes trys to eat you. These attacks are quite deadly.

How to Kill: You are surrounded by pillars so if you need cover use them. You cannot use the above ledge method as the area surrounding you is flat. The best thing to do is to make good of your starting distance as he is quite far away. Never stand still, he is quite fast for a yeti and like I said his attacks are deadly. Use your M16 or grenades to hack him down. It takes about 8 grenades to send him off home.

Found: Level 14

Boss 3: The dragon Xian

Looks: A golden brown coloured dragon, the biggest thing on the game, it has daggar buried deep in his heart.

Attacks: He has two massive deadly attacks. One is a one hit kill stomp so keep away if he starts to this. The other is that he breathes fire. If this happens and you are set alite then have about three seconds to find a small pool of water

which are scattered around the area. You can't use the above ledge method as there is no chance. To avoid the flames side jump and it's cruical you are always

moving. Be careful when underwater because when you surface he may be near. Always

use the look button to see if he is near.

How to kill: Use anything you have, the best weapon is the key, if you have grenades

use them, use your most powerful and damage taking weapon. Try to run past him then

turn and shoot until he turns around. You can also shoot him while moving so its impossible for him to flame you. Also use your surroundings for sheer victory. Once he falls to the ground you have 8 seconds to run up to its corpse and take the knife from its stomach. To find it, look for the inside stomach which is covered in blood. If it looks like he will get up just backflip away and shoot again. Once the knife has been taken from his body, he is dead.
Found: Level 17

Cheats

If you don't think you can beat these enemys then hear is some cheats to lend a helping hand. You enter these cheats during a level, don't press pause or select.

Level skip: HOLD R2 and press left,right,left,down,up (to sidestep in these directions) then let go of R2, spin around on the spot three times then do a forward twisting jump(a forward jump but in the air press O)

All weapons and Ammo: HOLD R2 and press left,right,left,down,up (to sidestep in these directions) then let go of R2, spin around on the spot three times then do a backward spinning jump (a backward jump but in the air press O)

Dynamite Lara(Lara blows up on entry): HOLD R2 and press left,right,left,down,up (to sidestep in these directions) then let go of R2, spin around on the spot three times then do a backward jump.

Thats it for my walkthrough but there still a few things to get out of the way.

Legal Stuff

1. This can only be posted on www.gamefaqs.com (THATS IT)
2. This should not be changed in any way shape or form unless you email me and ask.
3. More info is on Words of Notice on the top of the page.

About the author (Hey that's me)

Percy boi AKA Josh Pearce. I am 14 years of age and I am interested in sports and as you guessed games. I would describe myself as funny, silly and err really silly. I like punk/mod music. I would type more but I don't won't to lose track of anything else. Let me point out my other FAQs which are Robot Wars, Gran turismo concept and The simpsons road rage.

PS: I do have a social life and I have friends etc.

Thanks

I thank only three people and one thing, they are...

The End

Ladies and gentlemen, boys and girls it is that time again. For me to close

the curtains, shut the door or end the show. I hope this has helped you in
someway. Cheers. Goodbye, bon voyage, Auf Weidersen or See ya later. Here is
some nice advice. If you ever find yourself falling from a cliff remember to
enjoy the view.
