Tomb Raider 3

In depth walkthrough on enemys by percy boi

percyboi@hotmail.co.uk

Let start the show...yeah!?

## Version History

1.0 I have completed my guide with all the enemys,cheats and bosses revealed

1.10 I have added my new email address to the party!

## Introduction to guide

This guide you are reading is the key to defeating all enemys to Lara croft's Tomb raider 3. The enemys will be divided into two sections (one is bosses the other is enemys). I will include in each enemys file(looks,attacks,best way to kill and where this enemy is found).

## Introduction to the game (This is from my own knowledge of the story.)

Millions of years ago in Antartica, a metorite hit. It wiped out all life on the continent. Hundred years later in Anicent times, a tribe worshipped the mysterious metorite as a god claiming it had magical powers. In the present day the company RX Tech are researching the area where the metorite hit. There, they found anicent stautes and the grave of a english explorer. From the evidence of a diary it is belived that some english explorers came across the metorite and took four pieces from it, leaving a dying man behind (the grave). One of the pieces of the metorite is in India where Lara croft (famous explorer) is currently working, the other pieces are in London, the south pacific and Nedvada. But RX Tech are becoming increasingly intrested in the metorite as well... for different reasons.

## Walkthrough: READ THIS FIRST

The enemys are listed as you encounter them not in alphabetical. If I have missed any enemys please let me know. Unlike my other tomb raider enemy guides

you can travel to different levels of YOUR CHOICE. So I am doing each country as I did it. If you do travel to the countrys the same way, just scroll down until you find the country you are visiting. On the 'found' section, the number is the level number on that country (not overall). I HOPE I HAVE MADE THAT CLEAR!

## Enemys

### Section 1: India

You can also hear them breathing if they are close by.

Found: 2,3

Name: Guardian and Mutant Kings

Looks: The Guardian is black and fires green balls and the Mutant Kings are like Ground Mutants but bigger

Attacks: They are basically the same but guardians are more powerful, they will either hit you with green balls or crush you, either way are dangerous

How to Kill: Side Jump everywhere, don't let it near you. Always use the grenade launcher or desert eagle at least. Try to find the a upper ledge for advantage of height and just pray.

There are only four bosses on the game so I though I'd mention em.

Boss 1: Mad Willard Friend (Tony)

Looks: Wears a green fleuse and you encounter him in the temple

Attacks: Fires energy balls which are dangerous and tries to get you into the water which will instantly kill you. His energy sets you on fire.

How to kill: Jump constantly, from ledges around you shooting while in the air.

He should never hit unless you stop of course. Trust me, I followed this method and completed the boss first time. Remember that there are goodies around the room if your brave enough to get em. Once he's dead pick up the artifact and the level ends.

Found: Level 4 (India)

Boss 2: Puna

Looks: He sits on a throne, other than that I am not sure

Attacks: He turns his chair around and fires fire balls at you which kill you instantly.

How to Kill: As soon as his throne turns, side jump left and right giving him at least one rocket. Then pop your best weapon into him (still sidejumping)

he may spawn a Kimodo on you so take it down aswell, pop it some more with bullets until he summons another. Once you killed it take out your rocket or grenade launcher and pop his ass. But be careful when sidejumping to not fall off the platform.

Found: Level 4 (South Pacific)

Boss 3: Sophia

Killing Sophia is more of a walthrough and thats not my cup of tea if you know what I mean. So for a fantastic guide to it check out MHamlin Guide on GameFAQS where you found this. (Found London Level 4)

Boss 4: Dr Willard (Spider)

Looks: What in the hell does a big tranctula with 8 legs look like!

Attacks: Has three deadly attacks that will kill you instantly. 1) Chase you and squish and eat you. 2) Fires a bolt of lightening if your too close which WILL kill you instantly or 3) push you of the edge of the circular platform. Every way you will die

How to Kill: Okay, follow this very carefully. At the start go the way he ain't comin and once your about half the platform in front of him cap him with 2 rockets, do this once more to make him fall to the ground. Now roll and run down a corridor and grab a artifact, if you put down the spider right next to you, then when you come back he will there waiting to kill you. Do this again for the other three artifacts, you can tell if a artifact is down a corridor because the corridor glows. If you run out of rockets then use everything you got to bring him down. Once all the artifacts have been collected pop him 4 more times with rockets to make him die. Ci a Nara Spider!

Found: Antartica (Level 4)

Cheats

If you don't think you can beat these enemys then hear is some cheats to lend a helping hand. You enter these cheats during SECLT (INVENTORY) If they have worked you will hear Lara Moan, say no or Scream!

Level skip: L2,R2,L2,L2,R2,L2,R2,L2,R2,L2,L2,L2,L2,R2,L2,R2,R2,R2,L2

All weapons and Ammo: L2,R2,R2,L2,L2,L2,L2,R2,L2,R2,R2,L2,R2,R2,L2,L2,R2,L2,L2,R2

All Keys and Secrets: L2,L2,L2,L2,L2,R2,L2,L2,L2,R2,L2,R2,L2,L2,R2,L2,L2,R2,L2,L2

There is a cheat to replenish your health but its easier just to use one of the 50 small or large medi packs your given with the All Weapons and Ammo Cheat.

Thats it for my walkthrough but there still a few things to get out of the way.
