Tomb Raider

In depth walkthrough on enemys by percy boi

percyboi@hotmail.co.uk

Let start the show...yeah!?

Version History

1.0 I have completed my guide with all the enemys, cheats and bosses revealed

1.10: I have added my new email address

Introduction to guide

This guide you are reading is the key to defeating all enemys to Lara croft's Tomb raider . The enemys will be divided into two sections (one is bosses the other is enemys). I will include in each enemys file(looks, attacks, best way to kill and where this enemy is found).

Introduction to the game (This is from my own knowledge of the story.)

Thousands of years ago there was a anicent weapon called the sicon. This was a circle with ultimate power in the centre. It was forged from another world. Luckily, the scion was divided into three pieces and scattered around the earth. But, a evil outlaw from the planet that forged the scion travelled to earth to find it and rule the galaxy. Luckily the outlaw was caputured and frozen in time somewhere in mexico. But the outlaw's soul was'nt frozen and took the life of a woman named Natla. This evil woman has called upon lara croft

(amazing explorer) to find the pieces of the scion for Natla.

But Lara has no idea who she really is... not yet.

Words of Notice

I have some things to say about this walkthrough. Firstly, if this has affected you in anyway then email me, if it has helped, enraged or anything else to you then I want to hear about. If you spot a mistake, chat or even offend me then lets talk you loonies. Secondly, if you would like to use my information in this walkthrough then I expect credit in the FAQ made and an email about it. I would not want to give you a booking in court for copyright now would I?

Contents

1a. Introductions

1b. Words of Notice

1c. Contents- The thing you are reading, dumbass

2. Walkthrough- the main thing

3. Legal stuff

4. About the author/other FAQ's wrote/copyright/thanks

5. The end- don't cry

Walkthrough

The enemys are listed as you encounter them not in alphabetical. If I have missed any enemys please let me know. On the 'found' area of a enemys file the number means the level it appears on.

Enemys

Name: Bat

Looks: This creature is a tiny flying black bat

Attacks: There are usually several of them when they attack, they fly towards you then bite and scratch

How to kill: Just use one shot of your pistol to take one down, they can camouflage as they come from dark corners but to know if one is near by is to just listen for their flapping wings.

Found: 1,2,3,4

Name: Wolf

Looks: White grey four legged creature, looks like a dog

Attacks: Runs quickly towards you, leaps and takes a bite from you.

How to kill: Its numbers are random, sometimes they attack in a pack or sometimes in a one. But they are very fast so stay mobile.

If you have a shotgun handy then use it. Try to stay off the ground if you are with your pistols.

Found Level 1,2,3,4

Name: Bears

Looks: Brown, fourlegged and about the same size as lara

Attacks: Crawls towards you and scratches or eats you.

How to Kill: They always attack in one. You could try to use two shotgun shells to bring it down but if you don't then no problem. Try to find a above ledge so you have the advantage as he can't reach you. From here you can safely shoot him without wasting bullets. You can also try this for creatures like wolves.

Found: Level 1,2,3,4

Name: T-REX

Looks: What the hell does a big green T-Rex LOOK LIKE! If you are that dumb please read this?!

Attacks: It has many attacks such as swinging his tail at you, stamping on you and biting you.

How to kill: Pull out your best weapon and stand as far away as possible, then just blast it like hell. If he isn't dead when he reaches you roll so you back is facing him and start backflipping and shooting until you as far away as possible then shoot again. Repeat this sequence until he is dead.

Found: Level 3

A tip from Tom Doolan said:

For the T-Rex, you don't have to stay out in the open, where you can be shot to hell, there's a little opening in the rocks on the right of the valley, I think, and when you go in, if I remember correctly, there's a raptor, but once you kill it, the T-Rex will start walking around in front of the opening, it can't get you, but you can get it ;)

Name: Raptor

Looks: A black and orange patched dinosaur, about the height of lara

Attacks: Runs at you really fast and bites you (I hope he doesn't have scabies or nits). It attacks in packs

How to Kill: Pull out a shotgun ideally as it takes just one shot to bring it down. Hurry up when doing this because if it is too close you may not get a shot. Like many animals in this game it can't reach high ledges so use pistols to save ammo if you have a shot from above.

Found: Level 3

Name: Gorilla

Looks: A gorilla the size of lara, black furred

Attacks: Always come in packs, these guys can climb so you can't get a height advantage. These guys push you around everywhere

How to Kill: A shotgun shell can quickly rid you of them but if you want to use your shotgun and you want to use your pistols then keep moving around and try to keep off the floor

Found: 5-8

Name: Lion

Looks: Just like a wolf but golden brown furred

Attacks: Just like a wolf, they attack in packs

How to kill: These are a little harder to kill than a wolf, they are faster with their reflexes and take much more damage. Try to have a higher ledge advantage. Use a shotgun but if ammo is short use a magnam. Try to keep a distance from these.

Found: 5-8

Name: Crocodile

Looks: A green reptile with four legs, they swim underwater as well as on land

Attacks: Swim or crawls towards you and bites, he is quite slow when in the water but faster on land

How to Kill: They can't climb so try to use above ledge like every creature and try to use uzi's or a shotgun to take care of this pest

Found: 5-8

Name: Rat

Looks: A small crawling black mouse

Attacks: Crawls towards you legs and takes a bite

How to Kill: Takes about 5 shots of your pistol to kill, easy

Found: Unknown

Name: Puma

Looks: A bigger version of the lion, black furred

Attacks: He looks tough he is tough. He has all the factors of a lion but much more advanced

How to Kill: These guys are sometimes together and takes well more shells, clips or bullets to kill. Use the method I used to kill a lion on a puma

Found: 9-12

Name: Zombie Horseman

Looks: This horrible thing is covered in red pulsey flesh, it has a human head and a horses body

Attacks: Fires fireballs with his hands. When killed he self destructs so stay away.

How to kill: When he fires his flameballs dodge these by sidejumping as they are slow. Don't touch them or him as it takes about 1/6 of your health. I dislike

these zombie creatures more than anything else on the game (to be honest they give

me the creeps). Just use your uzi's nothing else really works

Found: 10-15

Name: Mummies

Looks: Big creatures that look like humans. They are covered in bandages and jump everywhere, they are always on there own

Attacks: He attacks like the zombie horseman

How to kill: Kill them like zombie horseman

Found: 9-15

Name: Zombie flyer

Looks: A zombie horseman but with wings

Attacks: Attacks just like a zombie horseman

How this kill: Kill this creature the same you would a zombie horseman

Found:

Name: Zombie Mummy

Looks: A cross between a zombie horseman and and a mummy

Attacks: Attacks like a mummy and a zombie horseman put together

How to Kill: Kill it like a zombie horseman and mummy put together

Found:

There are about eight bosses on the game so I though I'd mention em.

Boss 1: Larson

Looks: Wears blue trousers and a red top, looks like a cowboy

Attacks: Runs around you shooting you until your dead. So keep moving to avoid this.

How to kill: Use pieces of the terrain to your advantage like boxes and pillars. You can also use my above ledge method. If you are skilled at this game then you may only need a small medi pack to re-fill your health but if new keep a few large packs just in case. About 10-15 pistol bullets shells will take him down. If you are quick enough you may also try to run passed him, roll and get out a few

shots while he turns around.

Found: 4,12

Boss 2: Pieres

Looks: Wears a red jacket, he is fast so you don't really see his looks

Attacks: Runs around you shooting you until your dead. So keep moving to avoid this.

How to Kill: Use pieces of the terrain to your advantage like boxes and pillars. You can also use my above ledge method. If you are skilled at this game then you may only need a small medi pack to re-fill your health but if new keep a few large packs just in case. About 10 shotgun shells will take him down. If you are quick enough you may also try to run passed him, roll and get out a few shots while he turns around. You don't actually kill him he just runs off

Found: 5-9

Boss 3: Cowboy leader

Looks: A man dressed in a cowboy suit

Attacks: Runs around you shooting you until your dead. So keep moving to avoid this.

How to kill: Use pieces of the terrain to your advantage like boxes and pillars. You can also use my above ledge method. If you are skilled at this game then you may only need a small medi pack to re-fill your health but if new keep a few large packs just in case. About 35 pistol shells will take him down. If you are quick enough you may also try to run passed him, roll and get out a few shots while he turns around.

Found: 13

Boss 4: Skateboard Kid

Looks: Wears a red cap and blue t-shirt, rides a skateboard

Attacks: A teenager who rides around on his skateboard shooting you with uzi

How to kill: Use pieces of the terrain to your advantage like boxes and pillars. You can also use my above ledge method. If you are skilled at this game then you may only need a small medi pack to re-fill your health but if new keep a few large packs just in case. About 15 shotgun shells will take him down. If you are quick enough you may also try to run passed him, roll and get out a few shots while he turns around.

Found: 13

#### Boss 5: Bouncer

Looks: Wears a big grey coat covering his body

Attacks: A big dude who runs around you shooting a shotgun

How to kill: Use pieces of the terrain to your advantage like boxes and pillars. You can also use my above ledge method. If you are skilled at this game then you may only need a small medi pack to re-fill your health but if new keep a few large packs just in case. About 70+ uzi bullets will take him down. If you are quick enough you may also try to run passed him, roll and get out a few shots while he turns around.

Found: 13

#### Boss 6: Zombie Lara

Looks: The zombie horseman and Lara croft looks put together

Attacks: Attacks you by whatever you do. Eg shoot her with a pistol four times she shoots back four times

How to kill: The room is symmetrical. Go over the cliffy side of the room and jump the ledges to a switch, and a trap door. Throw the switch and she will be on the other side of the room doing excately the same. Throwing the switch opens a trap door next to you. You need to get her in that door. Hurry up though as it is only open for a minute before it closes again. So climb the ledges on the other side of the room and she will climb the ledges you were just at. Jump to the ledge that is symetricall to the trapdoor. Bad lara will now fall down the trapdoor into the lava.

Found: 14

#### Boss 7: Zombie Giant

Looks: A big zombie horseman

Attacks: Swings it's veins at you taking about half your life off. Touching it takes half your life off and when its dead it explodes and if your near it will probaly kill you.

How to kill: Run around the square platform firing your uzi's all around him rolling,jumping in all directions and running to avoid it. Collect all ammo for your uzi's. A good tip from other contributors of gamefaqs is to run behind it, stand still and fill it full of lead while it takes it's time to turn around and come at you. You will know it's dead from it's cluchting off stomach

Found: 15

#### Final Boss: Natla God/ Natla Human

Looks: A woman in a black skirt and blue top, she has zombie wings for arms

Attacks: She lys around the room firing fireballs everywhere to dodge them just use pieces of the terrain to your advantage like boxes and pillars. This is the only tip you can use when she is flying because you can't use the above ledge method if she is flying or trying to shoot her from behind. After about 130 uzi bullets she will fall to ground. But will get back up and shoot you with magnums. You can now try some methods above to kill her or just keep a small medi pack spare, stand right in front of her and shoot each other. When your health is low just use the small medi pack and carry on shooting , she will definately die.

Found: 15

#### Cheats

If you don't think you can beat these enemys then hear is some cheats to lend a helping hand. You enter these cheats during the inventory (press select). These may not work because of your PS version. This is my version ...

Level skip: L2,R2,TRIANGLE,L1,L1,O,R2,L2

All weapons and Ammo: L1, TRIANGLE, L2,R2,R2,L2,O,L1

Thats it for my walkthrough but there still a few things to get out of the way.

#### Legal Stuff

1. This can only be posted on [www.gamefaqs.com](http://www.gamefaqs.com) (THATS IT)
2. This should not be changed in any way shape or form unless you email me and ask.
3. More info is on Words of Notice on the top of the page.

#### About the author (Hey that's me)

Percy boi AKA Josh Pearce. I am 14 years of age and I am interested in sports and as you guessed games. I would describe myself as funny, silly and err really silly. I like punk/mod music. I would type more but I don't won't to lose track of anything else. Let me point out my other FAQs which are Robot Wars, Gran turismo concept and The simpsons road rage and of course tomb raider 2

PS: I do have a social life and I have friends etc.

#### Thanks

I like to say cheers to a ton of people such as my parents, my friends, gamefaqs for posting this guide, CORE for making the game, myself for being bothered to make this and YOU for reading it. Thanks for da help

-PERCY BOI ,2004-

#### The End

Ladies and gentlemen, boys and girls it is that time again. For me to close the curtains, shut the door or end the show. I hope this has helped you in someway. Cheers. Goodbye, bon voyage, Auf Weidersen or See ya later. Here is some nice advice. If you ever find yourself falling from a cliff remember to enjoy the view.
