----- EDIT MOVES LIST -----

- Version 0.1 (Sep/02/2006)

- A - Introducing
- B - Move List
- C - Revision History
- D - Copyright

A - Introducing

Yes, it's pretty late to write a move list translation for a game which was released in 1998. But I got my hands on this game just recently. And for creation of an edited wrestler it is necessary to have such translation, since it's a very time consuming act to go through every move to find a suitable movelist. With this (pretty old) game it's even harder because there's no animated preview (only screenshots) of the selected move. But don't expect too much while creating a movelist, because unfortunately some IMHO important moves are missing (i.e. Michinoku Driver or Emerald Frosion). But despite of some disadvantages this game has more replay value than the recent set of WWE games from Yukes.

And as I wrote in my other move list translations - please don't complain too much about errors you will encounter. And you will encounter lots of errors. First of because english is not my native language (german that is). And doing a guide in english about a subject that is in japanese from someone who speaks a different language will cause some unavoidable mistakes.

I tried to be as close as possible to the real in-game text. Everytime I couldn't translate a move I used some signs in my guide to make

clear what I couldn't translate or what is pure guess and may be false.

Here are the signs:

- ? - Move was written in Katakana but I couldn't translate it nevertheless
i.e. Brizado ? [Bridge ?]
- ??? - Move is written in native Japanese (Kanji), which I'm unable to translate
I only translated the Katakana and some Hiragana signs
i.e. One ??? or Meri???mi DDT
- [] - Move name is pure guess, may be false and needs some correction
i.e. ??? [Poison Mist] or ??? [Ipponzei ?]
- { } - American Name for a move which is different from the japanese in-game
text or Name of Wrestler which uses this move. Sometimes used as comment
i.e. Side Buster {Sidewalk Slam} or Bunnaguri Lariat {Kojima}
- <> - Points associated with that particular move. Maximum: 140000

In many cases you will encounter moves which are written like that:

30.RITAN LARIAT

Many moves are repeated very often just because most of them can used in different positions. But I made that moves more prominent (with underline and upper case) which are exclusive available in that very position or just new among the many repeating ones to make clear that this moves are special in this position.

In most cases I used two columns for similar move positions. If I used two columns the special moves among the repeating ones are easier to identify because I didn't typed the repeating ones from the first column again.

If you want to add new translations or correct my translations just mail me, but don't forget to add TR3 to your subject. I only read mails with the TR3 in the subject field because all other mails will be filtered as SPAM.

Sorry for that, but I have to do it that way.

Here's my address for contributions: Pesthauch666@web.de
