#### TRICKS

##### Get 8 Specials:

In the Hanger 18 level, destroy all four of the control panels and enter the warp inside the center of the level. You'll see another warp. Drive over to it and jump in. You'll see a UFO flying around. Shoot it to the ground to get 8 specials.

##### God Mode:

Press Up, Down, Up, Up, Circle, Right, Triangle, Square, Up, Down, L2, Right while playing any level.

#### HIDDEN WEAPONS

##### Egypt's Eve:

In Egypt at the Pyramid there is a tomb leaning on the outer side of the pyramid. Blow it away and go inside the pyramid. Blow up the statue inside and get into the warp. You'll be on top of the pyramid. There will be a little pyramid icon. That's Eve. It's a lot like a remote bomb. Leave it in one place and wait for someone to run into it or you can blow it up whenever you want.

##### Tokyo's Radar Dish:

I like this weapon a lot more than Eve!! There's a place in this level with a huge radar dish. Drive around the level till you find it. Near the dish you should see a ramp. Use a turbo (or a fast car) to jump across the gap and onto the other building. When you land you should see a ramp to your left. Drive up the ramp and you should see a ramp to your left again. Hit the ramp going the right speed and you'll land on top of a small building. If you landed on the building, great! Now drive to the top of the roof and just look over the edge a bit. You'll see a little radar dish icon. Go off the top of the roof at the right speed and grab

it. It could take a few tries but its worth it. This weapon makes the big radar dish in the level  
blow ever other car into nothingness.

#### Hangar's UFO:

Go to the same place where you shot the UFO down to get the 8 specials (blow up the four panels  
and go through the door at the center of the level). Shoot the big red round thing in the middle  
of this place and get the icon.
