I. INTRODUCTION AND REVISION HISTORY

Steve Blackman has kind of hanged around the WWF for quite some time. He hasnt gained a lot of popularity, and his personalilty and allies have changed throughout the couple of years he has been in the WWF. The Lethal Weapon first came in by himself, and basically was a mediocre wrestler. He didnt have anything to do with the major storylines.

Recently, he was hired by Stephanie McMahon to protect Kurt Angle's old winning record. After that ended, he was left out of any real storyline, until just a couple of weeks ago where he teamed up with Al Snow. While I have no clue what the direction of this team is going, I really enjoy watching the two wrestle, and they are one of my favorite tag teams. With Al Snows strange personalilty, he gave Blackman the name of Head Cheese, and the audience seems to think thats a great name for him, since Head Cheeses popularity has risen to new heights.

I created this FAQ for many reasons. One: No one has made a move list for Steve Blackman, and two: He has become one of my favorite wrestlers with this new Head Cheese angle. And it wasbored as heck, but the first two are the main reasons. =)

II. BIOGRAPHY (FROM WWF.COM)

Height: 6'2"

Weight: 246 pounds

From: Annville, Pennsylvania

Finishing move: The Guillotine

The pure wrestling machine that is the "Lethal Weapon" Steve Blackman shows

little emotion inside the squared circle. He lets his martial arts prowess do the talking. His reflexes are to be feared, as Blackman can deliver several kicks and punches with lightening-quick authority.
