Fusion

Fusion is probably the most confusing thing in this game. You can't tell what goes with what. Well actually, you can. There is a basic chart. This is the best, easiest fusion. (Thanks to Ngcheechong)

FEMALE Formation

- Female + Rock = Mystical Sand (2100/1800)
- Female + Plant = Queen of Autumn Leaves (1800/1500)
- Female + Spellcaster = Dark Witch (1800/1500)

DRAGON Formation

- [Dragon < 1600 ATK] + Thunder = Thunder Dragon (1600/1500)
- [Dragon < 1750 ATK] + Warrior = Sword Arm of Dragon (1750/2030)
- [Dragon < 1850 ATK] + Machine = Metal Dragon (1850/1750)
- [Dragon < 2000 ATK] + Rock = Stone D. (2000/2300)
- [Dragon < 2100 ATK] + Plant = B. Dragon Jungle King (2100/1800)
- [Dragon < 2400 ATK] + Time Wizard = Thousand Dragon (2400/2000)

Twin-Headed Thunder Dragon (2800/2100)

- [Dragon < 1600 ATK] + Aqua + Thunder
- [Dragon < 1600 ATK] + Rock + Thunder
- [Dragon < 1600 ATK] + Plant + Thunder
- [Dragon < 1600 ATK] + Zombie + Thunder
- [Dragon < 1600 ATK] + Machine + Thunder
- [Dragon < 1600 ATK] + Warrior + Thunder
- [Dragon < 1600 ATK] + Thunder + Thunder
- [Dragon < 1600 ATK] + Thunder + [Dragon < 1600 ATK]
- [Dragon >= 1600 ATK] + Thunder
- Dragon + [Thunder >= 1600]

* Dragon < 1600 ATK means Dragon with less than 1600 ATK

Exceptions

- * Dragon Zombie + Thunder Dragon = Skelgon
- ** Darkfire Dragon + Warrior = Flame Swordsman
- *** Blackland Fire Dragon + Celtic Guardian = Dark Elf

You press up on the two (or more) cards you want to fuse. If they are compatible, they will fuse. If not, the second card will take the field. This is the way to equip a creature with an equip magic card as well.

Victory Conditions

There are three ways you can win a match.

- The player to make the opponent's lifepoint run out wins.
- The player that doesn't have any more cards left in his/her deck loses and can't draw a card loses.
- A player that gets all five pieces of Exodia automatically wins the match.

S-POW

What is S-POW you ask? S-POW is when you defeat your opponent with brute force. When you want to get S-POW, here is what you want to avoid.

- Pure Magic Cards (Raigeki, Crush Card, Etc.)
- A lot of equips (Dragon Treasure, Bright Castle, Etc.)
- A lot of fusions
- More than 6 turns
- Less than around 6000-7000 Lifepoints depending on the duelist. If the duelist was a beginning one, then the Lifepoint should be above 7000. If the duelist is one of the last few, then your lifepoint can be lower.

As long as you don't do those things, you will most likely get S-Pow. There are some times when you get A-Pow, and that's when you do a fusion and equip. We are not too sure about this, but my theory is if you fuse and use an equip on the same turn, then your rank goes down.

S-POW will allow you to get rare and powerful monsters. Don't expect to get those in your first 20 duels though. You have to duel at least 100 times to get some cards, and for some cards, that's if you're lucky. For example, against a duelist named Jono 2, you might have to duel him over 200 times to get a Red-eyes B. Dragon.

On S-POW, you can sometimes get magic and trap cards, but it is not that quite common.

S-TEC

There are many questions asked about S-TEC, so here's the info on it. TEC is the same as Endurance. I guess the manual just changed the wording. Annoying, huh? Well anyway, S-TEC allows you to get Magic, Trap, Equip, Rituals, and of course, monsters. Don't expect to get an awesome card. In fact, don't expect a magic card at all! The chances of getting a bad monster is pretty high. Well with that noted, let me list out what to do (and not do) when you want to S-TEC.

Against opponents that fuses:

- Don't fuse. (You can fuse a card onto a card on the field.)
- Don't attack (unless it's against some strong person with powerful cards)
- Use TONS of magic, trap, and equip cards.
- I have found that having low lifepoint actually increases your chance of getting a good magic card.

Against opponents that never fuses:

- Don't fuse. (You can fuse a card onto a card on the field.)
- Attack.
- Use TONS of magic, trap, and equip cards.
- Have low lifepoint.
- Kill your opponent when you have 0 cards left. (Seperate your attack; don't finish off your opponent with one strong one, finish him with many weaker

ones.)

Remember, it will take many S-TECs to get the magic/trap/equip you want.

Starchips

Starchips are given out after you win a duel. The higher the rank, the more you get.

S-POW: 5 Starchips
A-POW: 4 Starchips
B-POW: 3 Starchips
C-POW: 2 Starchips
D-POW: 1 Starchip
D-TEC: 1 Starchip
C-TEC: 2 Starchips
B-TEC: 3 Starchips
A-TEC: 4 Starchips
S-TEC: 5 Starchips

These starchips are used in the menu under Password section. Here you enter an 8-digit code that is on the bottom corner of the real Yu-Gi-Oh! Cards. The good cards cost 999,999 Starchips though, so some are unobtainable.

=====
I) Creating a Deck

=====

A deck is required if you want to play this game. When you start a new game, you will receive a deck with 40 semi-random cards. You always get a Raigeki or Dark Hole, one basic equip, and one field. Then you get 37 low level creatures. Some will have an attack in the upper 1000s. Well now that you got the basic information, lets learn how to use cards you won to make a deck.

Now you can only have 40 cards in your deck, so go into your deck and take out as many cards as you want. Then go back to your chest, find the card you want to add into your deck, and just press X or Square. There; the card is in your deck. See, easy right? There are no restricted cards in this game, except for Exodia. So that means you can have 3 of each card in your deck.

Remember that you will not be able to play in Campaign mode or Free Duel if you don't have a 40-card deck.

=====

Here is how to read this information.

Destruction. Nothing too exciting though.

Duelist Name: Jono
Duel: Optional Duel

How to unlock: At the dueling ground, press Go Outside. You will end up at

the game.

Some good cards used: He doesn't use any good cards. Well sometimes, he uses
Mystical Sand by fusion. That's about it.

Some good cards given: I received a Fake Trap from him, and he also gives out
Dark Piercing Light.

Duelist Name: Villager 2

Guide

I will go in order, and when you can duel, some tips for that duelist.

Start a new game. Select a name and the story begins.

Ancient Egypt

A mysterious man is in a dark chamber and laughs an evil laugh.

You will be at your Palace. Simon, your guardian, will tell you not to go out and play card games. Well of course you will, so press RUN. Now for something important. Go right back to the palace. Duel Simon.

=====

Simon

=====

Simon is quite easy. Just keep destroying his creatures and he won't fuse. If he does fuse, he will create a Nekogal#2 or Mystical Sand. He has Sparks, but don't worry; it only does 50 damage.

=====

If you lose, restart the game because you don't want to skip everything here.

Now go to the card shop and save the game. Look at your deck to make some plans. Then leave and go to the Dueling Ground. You will see Teana. She will tell you Jono just left. Now duel Teana.

=====

Teana

=====

Teana is probably the easiest duelist in the game. She barely fuses, and when she does, it's a pretty weak card. Don't worry; if you know your fusions and cards, you will beat her.

====

Now when you beat her, click on Talk to Someone Else. You will talk to a mid-age man. He is also a duelist and you can duel him.

=====

Villager 1

=====

This villager is quite easy. He doesn't fuse many powerful cards though he sometimes creates Mystical Sand. Don't worry, he's the easiest of the bunch

====

Now click Talk to Someone Else again. This time a young boy will talk to you. Challenge him to a duel.

=====

Villager 2

=====

This young boy is a lot stronger than Villager 1. He uses Pumpking fusions, Mystical Sand fusions, and very rarely Twin-headed Thunder Dragon fusions. You should be able to make some good cards by fusion if you want to defeat him.

===

After you beat the second villager, an old man will appear. He is the third and final duelist. Challenge him to a duel.

=====

Villager 3

=====

This old man is probably the hardest duelist you will face in the dueling ground. He uses Twin-headed Thunder Dragon fusions, Pumpking fusions, Mystical Sand fusions, and other base cards with 1000+ attack points. Your best bet is to know your cards, be able to do fusions, and just have some luck.

===

Now that you have defeated all three villagers and Teana, click Go Outside. Teana will tell you there is a festival going on at the Plaza. You two will go there.

When you arrive at the Plaza, there will be a group of mages starting their ceremony. Teana tells you they have gotten worse and worse thanks to the high mage Heishen.

She will ask if you want to go somewhere else, but then you will find Jono. He is dueling someone, and loses. You three will talk, and Seto, the victor, is bragging, asking if there's no one that can beat him. Jono and Teana thinks you can, so they want you to duel him. Even if you say yes or no, you will end up dueling him. Well once that's over, go to the card shop and save. Then go to the hidden dueling ground

If you go to the Vast Shrine, you can get a quick look at your future opponents.

Now at the dueling ground, Jono will be there and he will ask you if you want to duel while you wait for Seto. Accept his challenge and duel him.

=====

Jono

=====

Jono is a bit of a challenge, but not much. His strongest card is a Pumpking by fusion, so be able to defeat it. He uses many low level cards.

===

Now after you defeat Jono, Seto will walk in with some Mages. It's time to duel this mage.

====

Seto

====

Seto is probably the hardest duelist you have faced. This is mostly because he has a Gaia the Fierce Knight. He can also bring out Pumpking a lot. You should just be able to make Twin-headed Thunder Dragon and pray you get the right cards. Oh he also has Final Flame so he can do 200 Direct Damage on you, so always have at least 1000 lifepointst if you can.

===

Once you defeat Seto, he gets mad and walks away, or so you think. He reappears and gets an evil look on his face, saying "Wait, you're... hmmm". He bids you farewell and walks away.

Now you have two options. Well actually three; you will definitely want to go save. You can duel Teana, Jono, Villager 1 and 2. Villager 3 won't duel you because he knows you will win.

Another option is go to the palace. There you will be sent straight to your room by Simon. Simon's guard tells him the mage Heishen invaded the palace and wields a mysterious power. Simon finds Heishen and tries to talk to talk to him but Heishen uses his Staff to stop Simon.

In your room, a woman tells you you're in danger and should leave the palace. But then Seto and his mages takes her away. You try to run but get caught. Seto tells you he wants the Millennium Items, and if he doesn't tell him the location of it, he will kill the King and Queen. Then Simon appears and gives you the Millennium Puzzle and tells you to run. You try to run but get caught by the high mage Heishen. There's no choice; you have to duel him.

=====

Heishen

=====

You can't win this duel. That's it. You have to lose. And besides, you can't win at this point of the game anyway. His weakest cards are probably stronger than your strongest cards. And if you win by some crazy fluke, you will have to duel him again. You have to lose.

===

Now that you lost, Heishen will tell you to hand over the puzzle. Simon tells you there's no choice and you have to shatter it. Shatter the puzzle, and Heishen will get mad. You and Simon will end up in a weird place with weird stairs. You two are locked in the Millennium Puzzle. Simon says it's the only thing to do, and they will have to wait for someone to complete the puzzle. The Egypt adventure ends here...for now.

Tournament

Now you are Yugi in present time. Joey comes in and wakes you up, telling you it's time for the tournament. You go dazely.

At the tournament, the announcements take place. Now it's time to duel. But first save the game. Then go outside for the duels.

Your first opponent is Rex Raptor, the Dino Duelist.

=====
Rex Raptor
=====

Rex's deck is stuffed with dinosaurs and some dragons. He will sometimes use Twin-headed Thunder Dragon fusions so watch out. You should be able to make some Twin-headed Thunder Dragons by now.

===

Now that you beat Rex, save again and Go Outside. Now your opponent is Weevil, the Insect duelist.

=====
Weevil Underwood
=====

Weevil is a lot stronger than Rex. Weevil uses Jirai Gumo with equips and Forest to make it over 3000 attack points sometimes. Having Mars cards will help, and remember to have Twin-headed Thunder Dragon

===

Now save and go back to the duels. Now you have to duel Mai. She is even stronger than Weevil so watch out.

=====
Mai Valentine
=====

Wow Mai is so much harder than Weevil for some reason. I guess because she uses many powerful base cards like Battle Ox. She also makes Twin-headed Thunder Dragon, Harpie's Pet Dragon, Harpie Lady Sisters, and she uses Dark Hole, Harpie's Feather Duster, and Bear Trap so watch out; if she plays a card face down, don't attack with a creature with 1500 or less attack points.

===

Ok now that you beat Mai you should go save and get ready to face Bandit Keith who has a whole mess of powerful cards.

=====
Bandit Keith
=====

If you thought Mai was hard, things are about to get even harder. He uses Zoa which has 2600 attack points, but he equips a Metal Morph on it to make a

Metal Zoa, making it a whopping 3000 attack points!! To beat this guy, rely on Twin-headed Thunder Dragon. If he uses Metal Zoa, unless you have Raigeki or Dark Hole ready, you will probably lose.

===

Now that you defeated Keith, you're done with the first part of the tournament. Now it's time for the Millennium Duels. Hehe I think that sounds cool; nah you're just dueling people with Millennium Items. These people are a lot stronger so watch out.

Shadi will talk to you. He lets you talk to your doppelganger. You receive six blank cards from him and leaves.

Shadi will be your next opponent. Get ready to duel, but first save.

=====
Shadi (M-Scale/Key)
=====

For a duelist in the finals, he is very pathetic. If you beat Keith, then he won't be a problem. He is THAT weak.

===

His Millennium Items get sucked into the cards you received before.

Now after Shadi you will have to duel harder duelists. Go save. Trust me, you will need to.

=====
Yami Bakura (M-Ring)
=====

This guy is just a huge jump from Shadi. He uses so many powerful cards; the cards that will kill you are the Millennium Shields and Labyrinth Walls. Use Twin-headed Thunder Dragon in Moon and use equips or Umi or Mountain. Watch out for his Magic and Trap cards.

===

Now his Ring is sucked into another card.

Well if you manage to defeat Bakura, it's time for even harder duelists. Go save and prepare for your hardest match ever.

=====
Pegasus (M-Eye)
=====

Jeez this guy is a pain in the butt. He uses great cards and knows what cards you play (creatures, not magic/trap). If you play a dragon face down, he will use Dragon Capture Jar. If you're unlucky, he will use a Meteor B. Dragon. See, didn't I tell you to save? Twin-headed Thunder Dragon is the key because

Dragon Capture Jar doesn't work on it. Now keep killing off his creatures so he doesn't sick his Raigekis. Sometimes he has 4!! He also has traps so watch out.

===

His Millennium Eye gets sucked into yet another card. Just two more left.

Well if you can defeat Pegasus, it's time for Isis. Go save and get ready to duel another person. You just need to defeat her to get to the finals.

=====
Isis (M-Necklace)
=====

Isis is usually easy if you can beat a Twin-headed Thunder Dragon, but once in a blue moon (well more common than that) she uses B. Skull Dragon with 3200 attack. If she does that, you will want to power up your Twin-headed Thunder Dragon. Be able to make a lot of Twin-headed if you want to win with ease.

===

Her necklace is now in the card. One more left.

Yay time for the finals!! It's time to duel *drumroll* SETO KAIBA!! He is hard so watch out. Go save and prepare for a hard and challenging duel.

=====
Kaiba (M-Rod)
=====

Well this match can be heaven or hell, depending on what cards you draw and what cards he draws. You will definitely want to be able to make Twin-headed Thunder Dragon with ease, and use the Umi field card. If you don't have an Umi, buy it for 50 Starchips. He has three Blue-eyes White Dragon so you won't want to use the Moon guardian star, but he has Labyrinth Walls and Millennium Shields so Pluto is also risky. I would go with Pluto though. He uses Crush Card so watch out; don't let him have any creatures out.

===

All the items have been sucked into the cards. The being in your Millennium Puzzle is now free to return to his own world. Simon is gone, but before he died, he told you to stop Heishen and the mages from getting the Millennium Items. It's now your job to stop them all.

Back to Egypt

Now that you're back to egypt, you have to do many things.

You are at the Shrine of Glory. When you leave, press left or right to go to the King's Valley. There you will meet up with Sadin. Tell him to take you to the Forbidden Ruins. Unfortunately, Sadin never heard of it so he can't. You have to find a map of some sort to give it to him, so for now, leave the

valley. Head over to the normal map area. Go to the old dueling ground. It is wrecked, but you will find Jono there. He takes you to the new, hidden, dueling ground. There, you can save and duel. You can duel Jono2, Teana2, Villager1, and Villager2. The two villagers are the same as when you first fought them.

=====
Jono 2nd
=====

Jono is now a lot stronger with a lot of good cards. He has Red-eyes B. Dragon so if you aren't prepared, then you can lose. All you have to do is get a creature with at least 2400 attack points, like a Thousand Dragon, and then he will put Red-eyes into defense mode. Then you can strike it. He gives out that Red-eyes, but only after a lot of duels.

===

Click Talk to Someone Else to duel Teana.

=====
Teana 2nd
=====

Teana2 is just as bad as the last time you dueled her. She uses Fairies and the field card Yami, which makes fairies lose power. As long as you have something with about 2300 or more attack points, you will be fine.

===

You can duel Villager1 and 2 but they are the same as the first time you dueled them.

Leave the dueling ground and go to the palace. Enter, and a mage will challenge you to a duel.

=====
Mage Soldier
=====

This guy is just a disgrace. He doesn't even deserve to be in the palace. His best card is a Summoned Skull by fusion. If you can beat a creature with 2500 attack points, then you can beat him.

===

Search Simon's old room. You will find a map. Leave the palace, press Circle, and go to the King's Valley again. Sadin will be able to take you to the Forbidden Ruins now.

At the ruins, you will find many things. Look at the map. Seto comes in and tells you it shows the locations of the Millennium Items. He tells you to defeat all the mages and leaves.

You can look at the drawing if you want, and then return. Leave the Valley.

You have access to all the mages. You can go in any order. Just remember to beat two to four High Mages ONLY. This way, you can duel Labyrinth Mage and Seto2, and later the game will be a lot easier.

=====
Ocean Mage
=====

The Ocean Mage is a bit hard to beat if you aren't prepared. You should be able to make at least 5 Twin-headed Thunder Dragons. The field will automatically be Umi so take advantage of it. Don't have any machine cards in your deck.

===

I would Return and save, but if you do you will have to duel him again, so make a decision. If you don't want to save, then just click Proceed.

=====
High Mage Sacmeton
=====

This guy is a bit of a challenge because he has Dark Magicians, Suijins, and Twin-headed Thunder Dragons. You should be able to make Twin-headed very easily, or you will lose. The field will be Umi again, so take advantage by using Lightning and water cards.

===

=====
Meadow Mage
=====

This guy is someone you want to unlock quickly. He gives out many good cards. He has Millennium Shields, and the field is Sogen so watch out. Use Twin-headed Thunder Dragon in Moon and an equip.

===

Do not proceed. Return, save, and free duel Meadow Mage until you get some Meteor B. Dragons. Then challenge High Mage Kepura.

=====
High Mage Kepura
=====

This guy is a pain. He has three Gate Guardians, Sogen powers them up, and he has equips for them. Have Meteor B. Dragons, put them in Sun, and use equips. That's probably the best way to beat him.

===

=====
Mountain Mage

=====
This guy is pretty easy. He has some Twin-headed Thunder Dragons but that's only by fusion. Here the field will be Mountain so use the Thunder, Dragon, and Birds to your advantage.

===

Now you can return and save, or just proceed.

=====
High Mage Atenza
=====

This guy is harder than Mountain Mage because he has Twin-headed Thunder Dragon as base, Sanga, Harpie's Pet Dragon, and B. Skull Dragon. He can power up the B. Skull Dragon to over 4500 attack points!! Watch out for that card, and have a powerful card out so you can quickly finish him off.

===

=====
Forest Mage
=====

This guy is pretty easy because he has many basic insects. Have some Mars creatures because most of his cards are Jupiter. He sometimes has Great Moth so watch out for that.

===

Now I would return and save because the next guy is really hard.

=====
High Mage Anubisius
=====

This guy is pretty hard because he has Perfectly Ultimate Great Moths. They have 3500 attack points and then there's the field bonus making them have 4000 attack points. With this battle Meteor B. Dragons and equips will be very useful. Having Eradicating Aerosol will also be good.

===

=====
Desert Mage
=====

This guy is pretty easy, except for his Labyrinth Walls and the field bonus. Get Twin-headed Thunder Dragon in moon and use an equip. That's all you need.

===

=====
High Mage Martis

=====
This guy is almost like Desert Mage, except he uses Dian Keto + Dian Keto fusion to create Megamorph. He can use this to equip it on Labyrinth Wall or a creature with high attack points. Watch out for this and have Twin-headed Thunder Dragon in moon with some equips out.

===

Beat 2-4 High Mages and go to the Hidden Dueling Ground. Jono will tell you Teana was kidnapped by some Mages. You two will go to the Vast Shrine. Here, you will duel Labyrinth Mage and then Seto2.

=====
Labyrinth Mage
=====

This guy is pretty hard because he has three Gate Guardians, Twin-headed Thunder Dragons, and Acid Trap Hole. Have Meteor B. Dragons in Sun and you can win.

===

From here go Right Right Left Right to get to Seto2. Now Seto will let Teana go and challenges you.

=====
Seto 2nd
=====

This guy is a bit like Labyrinth Mage. He has three Gate Guardians, but he also has Blue-eyes White Dragons, Metal Zoas, Meteor B. Dragons, and Crush Cards. Be prepared with Meteor B. Dragons and equips. He is pretty easy if you have the right cards.

===

After you defeat Seto, he gets excited and says you can definitely beat the mages. Hmm very suspicious. Well you will be at the Hidden Dueling Ground so go finish off the other mage(s) you have left.

After you defeat the remaining mage(s), Seto will walk in and tell you to come to the Vast Shrine. Go there and he will open the door to Heishen. He tells you that along the way you have to duel two of his guards.

Sebek and Neku appears. You have to duel both these guys. First Sebek, then Neku.

=====
Sebek
=====

This guy has Metal Zoas. Have Meteor B. Dragons and you should be find. Watch out for his Labyrinth Walls and Millennium Shields. He also uses Shadow Spells

and Acid Trap Holes so Curse Breaker and Harpie's Feather Duster might be good.

===

Now it's time to duel Neku. He's a bit harder so watch out.

===

=====

Neku

=====

This guy has many dark cards, and the field is Yami so this match can get annoying. He has Skull Knights and Summoned Skulls, and with the Yami boost, not even Twin-headed Thunder Dragons will do the job. Use Meteor B. Dragon in Moon, because if you use Sun, then Skull Knight can defeat it.

===

Now it's time to duel the mastermind behind all these evil duelists. That's right; you have to duel Heishen now.

=====

Heishen 2nd

=====

Boy this guy is a pain. He uses Gate Guardian, Meteor B. Dragon, Blue-eyes White Dragon, Metal Zoa, B. Skull Dragon, and he even has multiple Exodia pieces! What a cheater! Well you won't have to worry about Exodia because he never summons him. He also has Shadow Spell and Raigeki so watch out. Have Harpie's Feather Duster to wipe his Widespread Ruins away. Meteor B. Dragon in Sun with an equip is the best bet. Don't let him have any creatures out either.

===

Seto will walk in. He tells you to go to the Forbidden Ruins because all of the Millennium Items were collected. You will automatically get there.

Now Seto will challenge you. He wants the Millennium Items. He tells you how he wanted you to collect the items so he wouldn't have to do anything. He tells you that he wanted the items because of a chamber in the ruins. In the chamber, he can use all items to call upon an evil power. Now you have to duel Seto, and if you thought Heishen2 was hard, then this guy will be pure hell.

=====

Seto 3rd

=====

This guy is basically impossible to beat. He has three Blue-eyes Ultimate Dragons, three Widespread Ruins, three Harpie's Feather Duster, and basically three of every awesome cards. Your deck will want to have three Megamorphs, three Skull Knights, and a lot of equips for Skull Knight. Put Skull Knight in Mercury with those equips. If you can get his attack points to 4150, then you can defeat the Ultimate Dragon. This will take a while so don't give up. He doesn't always use Ultimate Dragons.

===

Now that you defeated Seto, you have the option to destroy the items or not. Either way, Heishen walks in and threatens to kill Seto unless you hand over the items. You have to hand them over to him. When you do, he summons the evil Dark Nite. Heishen tells him to obey him, but Dark Nite seals Heishen into a card and burns it. He says no one has the Millennium Items to control him, but you still have the cards with the items from the future. You can use those to seal him away. He agrees to give up, but only if you can defeat him in a duel. Well looks like you have another challenger.

=====
Dark Nite
=====

This guy is pretty easy; just don't let him have any creatures out. He uses many magic cards if you let him. His best card is a Cosmo Queen so this match shouldn't be too hard.

===

You thought it was over right? Well you're wrong. Now Dark Nite transforms into this big guy with gold armor and you have to duel him.

=====
Nitemare
=====

This guy is like Seto3 because he has cards similar to his. He has Ultimate Dragons, Gate Guardians, Meteor B. Dragons, Widespread Ruins, Harpie's Feather Duster, and Raigeki. Just get the Skull Knight with equips out and get some Meteor B. Dragons out as well. Don't let him have any creatures out because if you do, he will use magic cards or place traps.

===

Well NOW it's over. Nitemare screams N00000000000000000000 and disappears. Then the ending.

You will get a code after the credits. This code is NOT for Forbidden Memories. It is for the PS2 game coming out soon called Duelist of the Roses. If you plan on getting that game, then write the code down.

(There are 7 codes:

Dragon Capture Jar/Dark Hole Defreeze

When someone uses a Dragon Capture Jar or Dark Hole the game usually freezes. To protect yourself from this, whenever someone uses a Dragon Capture Jar or Dark Hole, keep pressing all the buttons. This usually prevents it from freezing. If it still freezes, take out the CD, wait a few seconds, and put it back in. You might have to wait a few seconds. If it is still frozen, keep pressing buttons. It usually de-freezes. If all this fails, you will have to re-start your Playstation, Playstation 2 or ePSXe.
