II. Version Info

10/24/2006 - Version 1.20

My first update in over three years, wow. I've changed my screen name and e-mail a long time ago and my old site at blackmage.org has been down since then. Someone else owns that site now. I consider this guide pretty much complete, but if you ever have any problems or suggestions then you can contact me now. My apologies to anyone who e-mailed me before and never got a response. This was the reason.

7/13/2003 - Version 1.13

I changed the link to download Cygnus from.

7/13/2003 - Version 1.12

Added ASCII Art to the top of the page. Thanks to Amitrius17 (<http://www.fantasyanime.com>) for making it, he rules. I also explained the "on/off" system in the Inventory Offsets section incase anyone was confused.

7/12/2003 - Version 1.02

Fixed a error, where I had accidentally said version 0.5 in version info instead of 1.0. I also added a link to my Rudra no Hihou site.

7/12/2003 - Version 1.0

The Save State hacking guide is submitted to GameFAQs, for the first time. Has information on Ragu, Inventory, and Character stats. Basically everything I can think of for now. If there's something you want added, then e-mail me (xolo@blackmage.org).

III. Ragu Offsets

Ragu 152E to 1530

Put 40420F in the offset above to get 999,999 Ragu. It will say you have 000000 on the menu screen until you kill an enemy or buy something, it resets to 999,999 then. Why it does this, I don't know.

IV. Inventory Offsets

Starts at 1413 and ends at 1512. The offset table uses a "on/off" (like in Front Mission) feature. What this means is, if you have none of a certain item, then the value for that byte will be F0. Set it to however many of this item you want (from 01 to 09). If you don't want to have any of a certain item, just set it back to F0.

VI. Credits
=====

Amitrius17 - <http://www.fantasyanime.com>

One of my best friends online, it was him who taught me how to hack save states. He even helped me with my mental frustration. He also made the ASCII Art at the top of this page. :D

NinjaC64 - He answered some questions I had about the game and about save state hacking.

Gideon Zhi - <http://agtp.romhack.net>

For translating such a wonderful game.

ZSNES - <http://www.zsnes.com>

For making such a great SNES emulator.

CJayC - For uploading this FAQ to GameFAQs. He owns the #1 gaming site in the world.

And You - For reading this.
