Updated on May 26, 2005

SECRET OF MANA- HIGH LEVEL WALKTHROUGH

05-23-05

By: David McDougall

E-Mail: smcdougall@cogeco.ca

~Path to the Mana Sword~

No enemies. No problem. Just get the Rusty Sword and cut the grass to the right.

~Path to Potos~

Because this is a High-level challenge, do destroy all of the Rabites on the way to Potos. You may take some damage, but don't worry about it.

At this point, Mat (the boy) should be at Level 3

~Potos Village~

After speaking with the elder and getting into a fight with Timothy, a quake rocks the village and you fall into a hole to fight the Mantis Ant.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

BOSS! Mantis Ant

Type: Insect

150 HP, 20 MP, 10 Exp, 100 GP

Abilities: Acid Breath

GEM MISSILE Lv.0

Preparations:

You can buy a Headband do to prepare because you have some money. Rest and Save you game at the Inn if you want.

Strategy:

Just battle him as you would in the regular game, If you die, Jema will revive you each time. The boss does use Gem Missile Lv.0, but you can't die here anyway. Just hack and slash away.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

~After Banishment~

Take the cannon to the Water Palace. You'll head there to seal the Water Seed (for now) and pick up a Spear. This is the weapon I recommend for Jenna, the girl. You don't have any other business here, so head for Pandora.

Josh should be level 3 or 4 at this point.

~Road to Pandora~

Kill all the Rabites and Mushbooms. You may want to defeat the Lullabuds. They give 3 exp, but they also give 8 GP each, so if you're desperate for Money, go after these.

Josh should be level 4 or 5 at this point.

~Pandora and Gaia's Navel~

Go to the castle and join up with Jenna. Give her the Spear you got from Luka at the Water Palace and level it up to level 1 (defeating Lullabuds and Buzz Bees only!) if you desire. If you have over 150 GP, buy the Hair Ribbon for Jenna.

Josh should be at level 4 or 5 at this point.  
Jenna (the girl) should be at level 1 or 2 at this point.

~Witch's Forest~

Be extremely careful here. If Jenna dies, don't worry. After the first teleporter, go to the left and try to cut the barricade. It won't work because you need an axe. This will make sure that Jenna follows you into the cave at Gaia's Navel. If you don't do this, when you try to go back to the forest, you'll be assaulted by a couple of Werewolves, worth a honking 30 Exp. each!

~Gaia's Navel Cavern~

Again, kill all the enemies. Head through the cave to the Dwarf Village.

Josh should be level 9 or 10 at this point.  
Jenna should be level 6 or 7 at this point.

~Dwarf Village~

Go to the Dwarf Show first, then to the Armor Shop, then to the blacksmith. Make sure you've got 100 extra GP to forge your Sword. Save your game after the show. If you have cash, buy armor for Josh only. The Spiky Suit is likely out of your price range. If you can afford it, buy Josh some Head Gear. It will increase his Defense by 7 points.

Josh should be around level 9 or 10.  
Jenna should be around level 6 or 7.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!

BOSS! Tropicallo

Plant

315 HP, 0 MP, 80 Exp, 132 GP

Preparations:

If you couldn't afford armor, go into the cave and trash some Blats and Kid Goblins for cash. Buy some armor and 4 pieces of Candy. Save the game before forging your Sword.

Strategy:

If you want money, try to beat the Brambler before you beat the boss. The Brambler gives only 2 Exp, but 24 GP! Jenna goes down quickly and won't be much help. Try to let the pumpkin blasts get close, then RUN (A Button) away before you get hit for 20 damage. Use a powered-up sword attack to do the most damage.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!

At this point, Sam (the sprite) will join you. Buy some armor for him after or before you buy Watts' Axe for 100 GP.

Josh should be around level 10 or 11.  
Jenna should be around level 6 or 7.  
Sam should be around level 1.

~Gaia's Navel Revisited~

Go back to Gaia's Navel and do exactly what you should do - LEVEL UP.

The

Werewolves will get you first. Instead, keep beating Lullabuds and Buzz Bees, as they give you the most GP per EXP point. Beat a few dozen of them, then head back to the Dwarf Village and upgrade your armor. Stock up on Candy.

~Witch's Forest~

Shortly into the forest, you'll find Neko. He sells items at TWICE the usual price, but what choice do you have? You will deplete your candies getting to the boss. Chocolates cost 60 GP, but buy 3 anyway. You'll be leveling up here anyhow, so get the supplies you need. Neko can also save your game.

When you get to the plants that you hit with your Axe, head to the right so you can lower the barricade to the castle. Defeat the Eye Spy as he may drop a fourth Chocolate. Anyway, press the switch to lower the barricade, then back up. Now hit the plants with your axe and progress to the castle.

Josh should be around level 11 or 12.

Jenna should be around level 9 or 10.

Sam should be around level 7 or 8.

~Witch's Castle~

Immediately when the map changes from the forest to the castle, start charging your sword. (It should be level 2 by now.) There are two Werewolves ready to assault you the moment you step foot in the area. Playing with a partner helps a lot here. On the way in, you'll see more Eye Spies. Beat them, they might drop Chocolate. Also beat the Werewolves, for they might drop something a lot better: Cup of Wishes! It sends the reaper running, but they aren't cheap. Neko's the only place you can get them, and he charges 300 GP a pop! Progress through the castle carefully. In particular, watch out for the Polter Chairs at the beginning, as they can do fatal damage if they trap you in a corner. When you reach a narrow passage about twice as wide as Josh, charge your weapon because two Werewolves come out of nowhere. After you beat them, you'll find a switch that apparently won't work. Head downstairs and you'll find soldiers that tell you the solution. You'll also find Neko. Replenish your Candies and Chocolates, then SAVE before buying anything else. Head back to the switch and your whole party will unlock the path to Elinee's lair. You'll have to deal with two Polter Chairs; handle them as you did the Werewolves. Now progress to Spiky.

Josh should be around level 12 or 13.

Jenna should be around level 10 or 11.

Sam should be around level 9 or 10.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

BOSS! Spiky Tiger

Type: Beast

520 HP, 21 MP, 210 EXP, 288 GP

Abilities:

Hi Jump

Swift Roll

Fire Breath

FIRE BOUQUET Lv.2

Preparations: Save your game in Neko's cell, as I told you to do before.

Try to not take any hits on the way from there to the boss fight. If you lose, you restart at Neko's cell. Purchase as many Cups of Wishes as you can afford, then try again. If you still lose and you have money left over after the Cups, buy Royal Jam. This should be enough. Bear in mind that if he engulfs you, a Medical Herb will dissipate the flames (odd I know, but it works.)

Strategy:

This battle is you can chose between the bow of the boomerang I used the Chobin's Bow.,  
That is also the only time he uses Fire Breath and the magic spell. Playing with a partner or two is helpful here. If you go it alone, you can charge your weapons or not. It's up to you. But control the Sprite (Select cycles among your characters) and shoot the tiger with normal attacks. If you don't, he'll stay up there forever. This is a easy fight, but you can win it.  
!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

~Undine's Cave~

Exit the Castle (you can't use the Magic Rope!) and the forest via the shortcut. Don't help Undine just yet. Go to the nearest non-Potos town, save and restock your items. NOW go to Undine's Cave (right of the Water Palace) and help the Water Elemental. You'll have to defeat a mini-boss here to proceed, but I won't write a strategy because he is easy if you restocked your items. Beat him and you get some valuable help. You can FINALLY cast magic! Jenna gets defensive spells (including HEALING magic!) and Sam gets offensive magic. Head to Pandora and restore your HP.

~Gaia's Navel AGAIN?!~

Yes, you'll be coming back here very often. Here, you'll want to level up Jenna's and Sam's magic. Cast Freeze or Energy Absorb on the enemies and cast Jenna's Remedy on whoever until their MP run out. Head back to town and stay at the Inn and save your game. Don't level up Jenna's magic in town or it takes twice as long. Repeat until Jenna's and Sam's Undine magic have both reached level 1. Then head for the Underground Palace, the entrance of which is in the Dwarf Village. Don't forget to replenish your item supply.

Josh should be around level 15 or 16.  
Jenna should be around level 13 or 14.  
Sam should be around level 12 or 13.

~Underground Palace~

Cast Freeze on the Energy Orb to drain the lava. When you enter the Palace, run through and ignore all the enemies. Run around and hit all the switches that open passages. When you reach the stage room, Sam must be alive. If he isn't, the game will not let you proceed.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!  
BOSS! Fire Gigas  
Type:  
850 HP, 66 MP, 326 EXP, 360 GP

Abilities:  
Teleport  
FIREBALL Lv.4  
LAVA WAVE Lv.4  
EXPLODER Lv.4

Preparations: Make sure Sam's MP is full and Jenna has at least 4 MP. This won't take long.

Strategy: When he isn't teleporting, bash him with Sam's Freeze spells one right after another. When he teleports, use Jenna's Cure Water spell to heal the party. As before, this won't take long. !!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

Enter the stage room, seal the Earth Seed, and pick up Gnome's powers of Earth. You're done here. If you can and you have Orbs, forge a better Bow for Sam.

~Pandora/Gaia's Navel~

Now that you have Gnome's magic and another Mana Seed, go back to Gaia's Navel and level up Sam's Undine AND Gnome both to level 2. Also level up Jenna's Undine to level 2 and Gnome as far as you can while Sam's magic is leveling up.

When you finish that, talk to Phanna, the blue-haired girl in the south part of the city. She teleports to the Pandora Ruins, south of the city.

Josh should be around level 16 or 17.  
Jenna should be around level 13 or 14.  
Sam should be around level 12 or 13.

~Pandora Ruins~

This is a short but difficult maze. The music is somewhat frightening, but don't let it freak you out. The Tomato Men here can cast a powerful FIREBALL Lv.2 spell that can do 70 damage, so just walk through the areas kill the enemies you meet. When you get to the end, you'll find Thanatos. He sends you into a hole where you find a boss.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

BOSS! Wall Face

Type: Evil  
920 HP, 99 MP, 580 EXP, 720 GP

Abilities:  
ENERGY ABSORB Lv.3  
FREEZE Lv.3  
CURE WATER Lv.3  
REVIVIFIER Lv.3  
Leaden Glare

Preparations:  
By rushing through the maze, you conserved HP and MP. This comes in handy here. There is really no preparation needed.

Strategy: Use Sam's GEM MISSILE Lv.2 or EARTH SLIDE Lv.2 on the center eye of the Wall Face. It can't last a lot longer than 4 spells. Be warned that if you knock out both of the Chamber's Eyes, the Wall Face will push you back. If you get crushed into the back wall, you can say goodbye to the rest of your party's HP.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

Before leaving Pandora, enter the castle and find the king. He grants you access to the Vault. It has six chests. Four contain 50 GP each. The other two have Weapon's Orbs; one for the Sword, one for the Spear. If you have over 800 GP

now and you can afford to do a little extra spending, buy armor from the second arms merchant on the right side of the city.

~Dwarf Village~

First of all, forge your sword and spear. Second, restore your HP/MP and save. Now you can go down the hole and battle the Scorpion Army's creation, Kilroy. If you check your status screen, you'll find that your Water Seed is missing. Don't forget about the weapon's orb in there!

Josh should be around level 16.  
Jenna should be around level 15.  
Sam should be around level 14 or 15.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

BOSS! Kilroy

Type: Machine  
900 HP, 13 MP, 686 EXP, 650 GP

Abilities:  
LUNAR BOOST Lv.1  
Hammer Attack

Preparations:  
Just stay at the inn.

Strategy:  
Stay away from him and keep casting Earth Slide Lv.2 and Gem Missile Lv.2. If he hits you with his hammers, you will probably end up moogled. Keep Medical Herbs ready in case. Bear in mind that he speeds up later on in the fight. If Josh's sword is at level 3 (and it should be), that does over 100 damage and the boss only has 900 HP...no problem!  
!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

~Water Palace Revisited~

Save the game now. This next battle is very hard for the underleveled party. Head to the Water Palace. You'll find the Empire there, waiting to break the Water seal. They'll ask you a series of leading questions but will result in the same result: a tough boss fight. Consider buying a Faerie Walnut from Neko if you can afford one, and pray  
!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

BOSS! Jabberwocky

Type: Lizard  
950 HP, 90 MP, 800 EXP, 768 GP

Abilities:  
Head Attack  
Poison Breath  
ACID STORM Lv.3  
CURE WATER Lv.3

Preparations:  
Stay at the inn and buy a Faerie Walnut if you can afford one, and pray.

Strategy:

No, seriously, this is a hard fight. It's too bad you don't have Salamando magic, because that's what he's weak to. Have Sam cast Level 2 Earth Slide or Level 2 Gem Missile. If the boss poisons the party, have Jenna use a level 2 Remedy on the entire party. The trick is to end the fight quickly because his level 3 Cure Water restores almost all of his HP. Have Josh use his level 3 charged sword attack. Acid Storm Lv.3 can wipe you out if you're not careful.  
!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

~Dwarf Village~

Go back here and get the Midge Mallet from the elder. This comes in handy in a future boss battle. Now go to the cannon travel outside Potos and blast off to Upper Land, after healing and saving the game of course!

~Upper Land~

Talk to the Moogles a couple of times before heading for Watts and Neko. Watts is in the area you blast to, while Neko is one area south. Forge the Bow if you can, then head to Neko and save. Don't buy armor here, though. Head for Summer (one area east of Neko) and go to the upper left corner. Take out the three Pebblers with charged attacks. Get the weapon's orbs after the fight. Talk to the moogles again, then exit. You will receive a clue.  
"Walk the seasons from spring to winter, spring again and we can enter."  
This means to exit the forest, walk counterclockwise around the forest until you hear a tone. Then you can enter Sam's Village and an easy boss fight.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

BOSS! Spring Beak

Type: Bird

720 HP, 99 MP, 1090 EXP, 864 GP

Abilities:

AIR BLAST Lv.2

THUNDERBOLT Lv.2

BALLOON Lv.2

SILENCE Lv.2

Preparations:

Make sure Sam's magic is full or close to full.

Strategy:

Very easy. Pelt the boss with three or four Earth Slide Lv.2 spells from Sam. The boss won't have time to cast a single spell!

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

Right now, the party should be around level 19 or 20.

~Wind Palace~

Nothing to do here except seal the Wind seed... it first seems. This is THE BEST place for leveling up Jenna's magic (except Lumina, which I don't bother with.) When her MP run out, just talk to the old Sprite in the palace and he fills up your HP/MP. Rinse and repeat until Jenna's magic is at level 3. You will receive Sylphid's magic in here.

<OPTIONAL>

[][][][][][][][][][][][]

If you wish, head to the cannon travel station in Summer and blast back to Potos. From there, head to Pandora. Just outside of Pandora are weak enemies perfect for leveling up Sam's magic to level 3. Also if the party's weapons aren't powered up, you can do this here. You will have to do this eventually,

so why not get it out of the way now?

[][][][][][][][][][][][]

~Upper Land~

Head to the lower-left corner of Spring, go through the passage, then cast an Air Blast Lv.3 spell on the Orb. This grants you access to Matango, after a LONG trip through forest. As usual, ignore all enemies. The Silktails are an annoyance because of their Acid Storm Lv.0. Notice that Square is recycling enemies already. The Silktail is really a Rabite Lv.2.

Right now, the party should be around level 21.

~Matango~

Purchase armor at the shop if you can afford it. Then head for King Truffle. He will then give you a quest to rescue a young dragon from the cave behind the palace. Faerie Walnuts are cheap here, at 500 GP, so purchase at least one of these.

~Matango Cave~

The enemies in here are tough, so rush through. Flip switches and activate Orbs. At the end, you will find a boss.

The party should still be at level 21.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

BOSS! Great Viper

Type: Lizard

1330 HP, 8 MP, 1410 EXP, 1056 GP

Abilities:

Swallow

GEM MISSILE Lv.5(!)

Preparations:

Make sure you have a Faerie Walnut, the Midge Mallet, and everyone's HP/MP is full.

Strategy:

This is a fast, mobile boss. When you use level 3 attacks, be careful. If you miscalculate, this boss can spit you out pygmized, basically killing you if you get hit again. This is where the Midge Mallet is handy. Use it on pygmized party members and they're back to normal. The trick is to end the battle fast, with Sam's Level 3 Air Blast. Thunderbolt does more damage, but 2 Air Blasts do more damage than one Thunderbolt. Without leveling up Sylphid, it took me 1 try to win.

You get a Sword's Orb here, giving you the ability to power up your sword to level 4. Doing it now would be good, so I suggest doing it NOW!

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

Note: You can go to the desert or the Ice Country at this point. I suggest heading for the desert first, because the enemies are very hard in the Ice area.

Now head into the next cave. After a scene, you and the dragon are transported to Fung Castle. The dragon stays with Truffle, and you are on your way to the desert, after stocking up on items of course!

The party should be around level 22.

OPTIONAL, BUT HIGHLY RECOMMENDED:

You should stay at the upper forest to level up your weapons and magic and your party level will be 31.

~Kakkara Desert~

You'll do a lot of meandering around here.

~Republican Sand Ship~

Talk to Sergo a couple of times to get out of the area, then look around to find your friends. The soldier on top of the ship will save your game. After you find your friends, Geshtar will attack.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

BOSS! Mech Rider A

Type: Machine

980 HP, 18 MP, 1595 EXP, 1055 GP

Abilities:

SPEED UP Lv.3

Mechcycle Charge

Mechcycle Missile

Preparations:

Not a lot you can do. Just wing it.

Strategy:

This is an even faster boss. But he is very vulnerable when he's not charging to the other side of the field. Whack him with Josh's level 3 sword (or level 4 if you have it at this point.) Have Sam hit him with any Level 3 spell.

I prefer Air Blast. This won't be too fast a battle, so expect Jenna to heal a few times.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

~Kakkara~

If the last place you bought armor was Pandora, you should have plenty of money to buy some Chest Guards and other armor here. It helps a lot because the enemies in the Ice Country are strong. Don't forget to stay at the inn before heading for Ice Country.

The party should be around level 33 or 34.

~Ice Country~

Save the game at the Inn but don't stay. Head into the Ice Forest and you'll immediately get assaulted by Howlers. They have a fairly high critical hit ratio. If they get a critical, expect about 125 damage to come your way. After wandering around, you'll face a (recycled) boss.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

BOSS! Boreal Face

aka Tropicallo Lv.2

Type: Plant

1100 HP, 12 MP, 2245 EXP, 1040 GP

Abilities:

Pumpkin Bombs  
BURST Lv.4 (this kicks butt)  
CURE WATER Lv.4  
SLEEP FLOWER Lv.4

Preparations:

You've already done everything they can legitimately do. Just pray.

Strategy:

This is a long fight because any of your spells aren't really effective. Have everyone use their weapons here. There's no trick, it just takes practice.  
!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

~Scorpion Army's Resort~

You can look around, but there's only one thing to do here: get Salamando magic. And the boss you just beat was weak to Fire magic...that is a shame!

The party should be around level 34 or 35 now.

<OPTIONAL, BUT HIGHLY RECOMMENDED>

[][][][][][][][][][][][]

At this point, I strongly recommend heading back to Pandora/Gaia's Navel/Wind Palace and leveling up Sam's and Jenna's Salamando magic to level 3. Why only level 3? You have four elementals, but only THREE Mana seeds. Too bad. And why both of them? Jenna can actually ATTACK now! She gets a couple of (weaker) attack spells that will be handy and angin if you have a weapon orbs go to Watts and fore them.

[][][][][][][][][][][][]

~Outside Ice Palace~

Talk to Neko and save. Don't purchase anything. You should've bought Faerie Walnuts in Matango when you went back to level up Jenna's magic.

~Ice Palace~

This can be a maze, so see another walkthrough if you need more help. The Blue Drops are a nuisance in particular because they freeze you. If you get frozen, head for a door so you don't take any more damage. After some wandering, you get to a familiar boss: Tonpole/Biting Lizard. Except you face three of them. This is an easy fight because with the new armor you bought, their attacks barely damage you. Now we get to the REAL fight....

Oh, by the way, the party should be around level 33.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

BOSS! Frost Gigas  
aka Gigas Lv.2

Type: Spirit  
1140 HP, 99 MP, 3045 EXP, 1200 GP

Abilities:

Freeze Breath  
ACID STORM Lv.6 (this is nasty)  
FREEZE Lv.6  
ICE SABER Lv.6 (casts this on you, causing your attacks to do nothing)

Preparations:

Be sure your fire magic is at level 3.

Strategy:

This is a short fight. Slam him with level 3 fire spells from both players. He'll go down in a hurry.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

NOW you get the Fire Seed, but you have to seal the Seed at the Fire Palace to gain its power! So head back to Kakkara now.

The party should be around level 34.

~Kakkara~

Buy supplies like Faerie Walnuts/Cups of Wishes, then buy armor if you can. Save and rest at the Inn, then head for the Fire Palace. To get there, head into the desert, then one area south, then one area west, then one area north.

~Fire Palace~

This is kinda hard because the Robin Foot enemies (Chobin Hood Lv.2, notice the irony?) have a Flame Saber Lv.4 spell that causes you to be engulfed. Exploring is important here because there are chests that have 1000 GP, and you desperately need money. Don't forget that you have to use an Exploder spell on the crystal orb to blow the lava away. There is a tough boss fight ahead.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

BOSS! Minotaur

Type: Beast

1200 HP, 99 MP, 3348 EXP, 1440 GP

Abilities:

Horn Charge

DEFENDER Lv.7

EARTH SLIDE Lv.7 (yikes)

Preparations:

You've done everything you can at this point.

Strategy:

Tough fight because his horn charge can put you to sleep, and his Earth Slide is level 7! Immediately have Jenna heal the party after an Earth Slide. Sam uses level 3 Air Blast constantly.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

The party should be around level 34 or 35.

The big reward is sealing the Fire Seed.

At this point, head back to Pandora/Gaia's Navel/Wind Palace again (I know it's a very long trip, but do it anyway) and build up Jenna's magic and Sam's magic to level 4.

Now the cannon travel in Kakkara can take you to the Empire. Heal, restock your inventory, and save before heading to the Empire.

Southtown~

This is where you'll end up after Cannon Travel. Look around for a spy heading

back to her house. Enter the house and she'll tell you a secret code 634. You need to speak to her before you can input it to the guard, even though the code is the same every game.

~Empire Sewer~

The only new enemy here is Dinofish (Iffish Lv.2.) Run through here quickly, kill all enemies. At the end, you wind up at Resistance Base in Northtown.

~Northtown~

Stay at the Inn and save, but don't buy anything yet. Head for Northtown ruins. The party should be around level 35.

~Northtown Ruins~

This is a very long and hard dungeon. We will take two trips just to be cautious.

On the first trip, just get the three weapon's orbs in here (Sword, Spear, and Bow...the three weapons we chose at the start...how convenient!)

~Northtown~

Now head back to Northtown and get at least the Sword forged.

NOW you can buy items (you won't be able to afford armor.) Save and head back to the ruins.

The party should be around level 35.

~Northtown Ruins~

Now go back in and finish the job. It should be a slightly shorter trip. Conserve your resources for the dual Boss fight at the end.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

BOSS! Doom's Wall  
aka Wall Face Lv.2

Type: Evil  
1180 HP, 99 MP, 4750 EXP, 648 GP

Abilities:  
THUNDERBOLT Lv.5  
ENERGY ABSORB Lv.5  
CURE WATER Lv.5  
REVIVIFIER Lv.5  
Cave-In

Preparations:  
Make sure you forged Excalibur for Josh as it is a Light-element sword.  
The party should be around level 35 or 36.

Strategy:  
This is similar to the Wall Face except there's no spiked wall (yay!)  
His magic is stronger too, and he has more of it. He likes to use Energy Absorb and Thunderbolt in particular. Use Gem Missile/Earth Slide as before.  
He's weak to Light magic but you have none right now. Don't use too much magic here, remember there's another boss fight after this! But you can go back to Northtown and re-supply.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

Now, the party should be around level 35 or 36.

At this point, you have two options: go back to Northtown and save, or head to the other boss now. I suggest going out and buying at least two more Faerie Walnuts for Sam. He'll need them.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

BOSS! Vampire

Type: Evil

2550 HP, 99 MP, 5148 EXP, 696 GP

Abilities:

Sleep Ring

Bite

Hi-Jump

ENERGY ABSORB Lv.4

FREEZE Lv.4

Preparations:

Make sure you have 2 to 3 Faerie Walnuts and Josh has Excalibur.

Strategy:

This boss has a LOT of health, meaning this will take a while. Try casting Freeze, Air Blast, Gem Missile, and Fireball. Then use whichever one did the most damage to him. Don't use Energy Absorb as the boss reverses the effect, meaning you take damage. Jenna's Cure Water Lv.4 will be used a lot here. Take your time, this is a long fight.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

~Northtown~

Head for Resistance Base. This triggers your ability to enter the Emperor's Castle (good music theme in there!) But save and buy Faerie Walnuts. I know that it's tempting to buy armor right now, but don't do it yet.

~Emperor's Castle~

Follow the path the soldiers are in. After you find the Emperor, he locks you up. Talk to the guard and he lets you out. You then face a boss. The party should be around level 36 or 37.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

BOSS! Metal Mantis  
aka Mantis Ant Lv.2

Type: Insect/Machine

1220 HP, 40 MP, 4749 EXP, 1464 GP

Abilities:

Double Claw

Fire Beam

LUNAR BOOST Lv.6

GEM MISSILE Lv.6

Preparations:

Nothing really.

Strategy:

This guy isn't hard, he just has more attacks than his cousin. Attack with any of Sam's spells. Basic strategy. Easy.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

Now the castle is filled with monsters, and you can't go back to save the game!

The party should be around level 36.

Now the enemies get tough. The Embermen can engulf you, and the Dark Ninjas can go invisible and use Flame Saber, but it's only level 2. Don't forget the chests; some have much needed money inside! Make your way back around to the entrance and take the left stair this time.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

BOSS! Mech Rider B

Type: Machine  
1258 HP, 30 MP, 6013 EXP, 1500 GP

Abilities:  
Mechcycle Charge  
Mechcycle Missile  
Wave Cannon  
SPEED UP Lv.5

Preparations:  
Nothing really.

Strategy:

There is only one difference between this fight and the one in the desert: a special attack called Wave Cannon, but it can do upwards of 150 damage. Other than that, this fight is pie. Have Sam whack Geshtar with Air Blast.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

The party should be around level 36 now.

After the fight, King Truffle (of all people) saves you from destruction. He provides you with Flammie. You can now fly on this dragon wherever you need to go. It's faster (and cooler) than Cannon Travel. This is why I wanted you to hold off on buliding up your weapons. After you fly Truffle back to Matango, head for Pandora again. Level up your active weapons to level 5.

Now you can head for the Lofty Mountains.

~Mandala~  
Save the game at the Inn and buy supplies. Buy Circlets and Ivy Amulets if you can afford them. Do not purchase Magical Armor.

Head through the Lofty Mountains to the Dark Palace.

<OPTIONAL, BUT HIGHLY RECOMMENDED>  
[] [] [] [] [] [] [] [] [] []

The Dark Knights here (Armored Man Lv.2) will sometimes drop Magical Armor or Gauntlets. Fight them until you get one, then equip it, head to town, and save your game. If you fight more than 8 or 10 of them, getting no item, hit reset and try again. This armor will help a lot in the next three Palaces and train your weapons.

[][][][][][][][][][]

The party should be around level 35 or 36 now.

Go through the Dark Palace, getting the weapon's orb. At the end of the Palace, a boss awaits.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

BOSS! Lime Slime

Type: Morph

3470 HP, 99 MP, 8000 EXP, 3000 GP

Abilities:

Slime Bubbles (various effects, depends on color)

DARK FORCE Lv.5

EVIL GATE Lv.5

DISPEL MAGIC Lv.5

Preparations:

Make sure you got the armor from the enemies.

Strategy:

This is a fun fight. The boss shrinks when it takes damage. Dark Force can cause problems as it will do loads of damage. The trick is to have Jenna and Sam cast level 4 Fire spells, but leave a few of Jenna's MP for healing the party.

Don't cast status-altering or saber magic, as the boss will get rid of it.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

After the fight, head for the Gold City. Stay at a cheaper Inn before coming here.

Go to the Inn to save the game. The armor here is WAY and I mean WAY out of your price range,

so don't bother. Just talk to the guy on top of the elevated area. You have to go all the way around to get to him. After the conversation, have Flammie fly you to Southtown. Talk to Mara (the spy) and she gives you a key to the Light

Palace. Fly back to Gold City, save, then enter the Light Palace. There is another

dual Boss fight here.

~Light Palace~

You are immediately assaulted by two Beast Zombies (Howler Lv.2.) Kill them, getting the orb on the way back. Very shortly, you encounter the first of two Bosses here.

The party should be around level 26 or 27.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

BOSS! Blue Spike

aka Spikey Tiger Lv.2

Type: Beast

1980 HP, 99 MP, 9150 EXP, 3840 GP

Abilities:

Hi-Jump  
Swift Spin  
Acid Bubbles  
FIRE BOUQUET Lv.6  
Fire Breath  
FIREBALL Lv.6

Preparations:

Not a lot you can do, just be careful, for there is another boss ahead.

Strategy:

Spells don't have much effect, so use whatever you want. I suggest controlling the Sprite the entire time, because he is the one who has the bow or the boomerang. The tactics used with the Spiky Tiger work here, although you can evade his Swift Spin by diving into the lower left or upper right corners. He doesn't die the first time he starts to blow. When this happens, he's down to about 500 HP.  
!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

After the fight, you encounter a room very similar to the last one. There is another boss on the next floor, as well.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

BOSS! Gorgon Bull  
aka Minotaur Lv.2  
Type: Beast  
2470 HP, 99 MP, 9755 EXP, 4800 GP

Abilities:

Horn Charge  
Fist Slam  
DEFENDER Lv.8  
EARTH SLIDE Lv.8(!)

Preparations:

None really.

Strategy:

Use the same strategy as with Minotaur. This boss is even weaker to Air Blast than his cousin is, so go to town with that.  
!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!  
Now you can get Lumina magic! You're probably anxious to level up magic now, but let's take one short trip first... Use the Magic Rope to go to the entrance. Don't forget the weapon orb you left behind! After you exit, ride Flammie to the desert section with a very dark area in it. This area leads to the Moon Palace.

The party should be around level 30 or 31.

~Moon Palace~

Run past the Marmablues and into a door. Wander around in the next area until you find an orb. Use a Lucent Beam on the orb and you transport to the stage room. Get Luna's powers and seal the seed.

NOW you can level up your weapons and magic. Ride Flammie to Potos. Use the Cannon Travel to go to the Upper Land. You could fly to Matango, but the trip to the

Wind Palace is longer. When you get there, level up ALL of Jenna's magic to level 7. When you finish that, fly to Pandora and level up all of Sam's magic to level 7, especially Luna. Level 7 Magic Absorb is vital to success in the rest of the game. Now continue with the rest of the game.

~Tasnica Castle~

There is an Imperial Spy in the castle, so it's your job to fly here, find him, and take him out. This spy is a Dark Stalker (he's an enemy on the Mana Fortress!) and he's powerful. He has a Shuriken and a sword, and he likes to use power attacks with both of them. They do about 160 damage at this point. Take him out and hope he drops Ninja Gloves. Afterward, you get a Sword's Orb. Don't forge it yet, you should have enough money to purchase better armor in the castle. Don't forget to save the game.

The party should still be about level 28 or 29.

~Lofty Mountains~

Ride Flammie to the Lofty Mountains and go to the top. Sage Jehk will give you a test. You enter a cavern with very powerful enemies; ignore them. Make your way to the end of the cave and you find your evil twins. Josh has 999 HP, and Jenna and Sam have 800 HP each. Notice that they have the same HP your level 99 characters will have? They use charged weapon attacks up to level 7. If you can beat them, you have proven that you are more powerful than yourselves!

After the conversation with Jehk and Joch, fly to Mandala and save the game. Now the hard part of the game begins...

~Tree Palace~

Quickly ride Flammie to the Tree Palace. It's in the middle of a sunken continent. Enter and you'll find the Empire waiting to break the last Seal. You will face a boss almost immediately.

The party should be around level 28.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

BOSS! Aegagropilon

Type: Plant

3016 HP, 99 MP, 11050 EXP, 1800 GP

Abilities:

SLEEP FLOWER Lv.7

BURST Lv.7 (this hurts big time)

WALL Lv.7 (this also hurts)

Preparations:

This is a very tough fight, so make sure you have four of every restorative item as well as any armor you can afford.

Strategy:

Wall reflects your magic back at you. Ow. He also casts Sleep Flower often. Cast magic until he uses Wall, then use Dispel Magic, level 5 or higher. Dispel Magic of any level or lower cannot undo Wall. Consider having Jenna use Level 7 Moon Saber to recover HP instead of using Cure Water. If you can't get rid of

Wall,  
reset the game and build up your Shade magic.  
!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

You lose the power of ALL your Mana seeds after this battle, but you can still raise your new Dryad magic to level 7, and I recommend you do (the usual way.)

After the battle, Flammie rescues you from the rising continent, and you can explore it afterward. If you want, you can repeat the "Dark Palace" procedure for getting Magical Armor or Gauntlets if you need to. Avoid the Metal Crawlers. If a party member gets trapped by one, he's good as dead.

The party should be about level 36 or 37 now.

~Underground City~

This is really tough because the enemies are frequent. The Kimono Wizard spawns Metal Crawlers. Run through quickly, pressing all the switches. Conserve items here, for there is a dual Boss encounter here.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!  
BOSS! Hydra  
Type: Lizard  
3382 HP, 99 MP, 12439 EXP, 3600 GP

Abilities:  
Current  
ACID STORM Lv.1  
CURE WATER Lv.1

Preparations:  
The only thing you need to do is make sure Dryad magic is at level 7.

Strategy:  
This boss can really do a lot of damage to you with its head attacks. Finish it quickly with Fire Bouquet and Exploder spells, both level 7.  
!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

Now you have a LONG walk through the Underground City, and the place is teeming with enemies. Kill them and walk through. Be advised that there a few Dark Stalkers near the end. At the end, you'll end up facing the Scorpion Army, and they have a Super Deluxe Special Robot Level 2, Kettle Kin.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!  
BOSS! Kettle Kin  
aka Kilroy Lv.2  
Type: Machine  
1230 HP, 33 MP, 15555 EXP, 3360 GP

Abilities:  
Hammer  
LUNAR BOOST Lv.5  
LUCID BARRIER Lv.5

Preparations:  
The only thing you need to do is make sure Dryad magic is at level 7.

Strategy:  
This is a quick fight. A few level 7 Burst spells should end this.  
!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

Now you have to re-enter the Tree Palace from the bottom entrance. A shortcut has been created for you so you don't have to go through the Underground City again. Ride Flammie to Matango to restock your items, then ride to Gold City or Tasnica and purchase armor.

~Tree Palace~

Conserve items here, there is a TRIPLE Boss threat at the end. The Heck Hounds (Howler Lv.3) can spawn more wolves. All the enemies in here are annoying, including Turtlance (Shellblast Lv.2), Gremlin (Imp Lv.2), and National Scar (Mystic Book Lv.2.) There are seven rooms which have an orb, one for each element. When you hit the last one, a staircase will allow you to the level at which you entered the first time. There you face a powerful foe.

The party should be around level 38 or 39.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

BOSS! Snap Dragon  
aka Biting Lizard Lv.2  
Type: Lizard  
1215 HP, 6 MP, 19200 EXP, 12480 GP

Abilities:  
CURE WATER Lv.5

Preparations:  
All magic is at level 7.

Strategy:  
Finish this boss quickly with Fire spells, and hide in the corner. If he attacks a party member, the party member is done for.  
!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

Now head to the stage room, and enter the next room. There you face the second of three Bosses.

The party should be around level 34.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

BOSS! Hexas  
Type: Evil  
3465 HP, 69 MP, 20103 EXP, 14400 GP

Abilities:  
Pygmus Glare  
DISPEL MAGIC Lv.6  
FREEZE Lv.6  
ACID STORM Lv.6  
GEM MISSILE Lv.6  
EARTH SLIDE Lv.6  
AIR BLAST Lv.6  
THUNDERBOLT Lv.6  
FIREBALL Lv.6  
LAVA WAVE Lv.6

Preparations:  
All magic is at level 7.

Strategy:

Annoying Pygmy Glare can be countered with the Midge Mallet. After casting some magic, use Magic Absorb to refill Sam's Magic at the Boss's expense. This is a long fight, so be patient.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

The party should now be around level 40.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

BOSS! Mech Rider C

Type: Machine

4327 HP, 38 MP, 21104 EXP, 16000 GP

Abilities:

Wave Cannon

Diffuser Cannon

Mechcycle Charge

Mechcycle Missile

SPEED UP Lv.5

WALL Lv.5

Preparations:

All magic is at level 7.

Strategy:

Geez, I'm getting sick of this guy... Same strategies as before, except when he uses Wall, get rid of it with Dispel Magic, then use Magic Absorb and attack spells.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

The party should now be around level 40 or 41.

-----  
Here's my situation. My party is around level 40, and I have most of the armor from Tasnica. I save, then ride Flammie to Pure Land. About 10 seconds into Pure Land, a Needlion (Pebbler Lv.2) killed both my other party members in ONE hit. This is easily the hardest part of the game. There are SIX bosses to deal with here. Josh then lost his HP when an Ice Thug used Acid Storm Lv.7 for 421 damage. (He only had 389 HP.) Back to the drawing board. When I figured out the handicap I was not strong enough so I lever up to Lv.59

~Pure Land~

About the fifth or sixth time I died in Pure Land's first few screens, I was ready to give up. That is, until I saw an Eggplant Man (Tomato Man Lv.2) use LUCID BARRIER Lv.7! That's when it dawned on me - a way to overcome my handicap! Lucid Barrier! Anyway, the trick to getting through Pure Land without dying all the time is that spell you've probably never used in the entire game.

Section 1

When you first get to Pure Land, immediately run up the screen and you might not get hit. If you are hit, you can say goodbye to both your party members.

In the next area, cast Lucid Barrier on the entire party. If you don't, the Griffin Hands will whack you for 300 damage!!

In the next area, quickly cut through the grass and head to the right, then up,

then to the left when you see a cave. Go through the cave and IMMEDIATELY cast Lucid Barrier again. You'll find out why shortly.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

BOSS! Dragon Worm  
aka Great Viper Lv.2  
Type: Lizard  
3525 HP, 99 MP, 24290 EXP, 17460 GP

Abilities:  
EARTH SLIDE Lv.8

Preparations:  
Party's HP is full and Lucid Barrier and Wall are active.

Strategy:  
This is an easy fight if you can keep Sam alive. If he falls, use Revivifier or a Cup of Wishes. Eight or nine Air Blasts (Level 7) should finish this boss. Don't let him swallow you, it will do over 200 damage and you come out moogled AND pygmized. If you get hit in that state, expect to take 999 damage.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

## Section 2

This is a short section. Before you advance, go back to the boss arena and re-cast Lucid Barrier in case Wall is still active. Head to the next area quickly.

The next area has no enemies. A spirit at the gate tells you that you have to defeat the dragon to the left in order to pass. Not only are the dragons hard to beat, you almost have to attack them with magic.

The party should be around level 59 or 60.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

BOSS! Snow Dragon  
Type: Dragon  
3525 HP, 99 MP, 24290 EXP, 17460 GP

Abilities:  
FREEZE Lv.7  
Breath Wing  
Freeze Breath

Preparations:  
Party's HP is full and Lucid Barrier and Wall are active.

Strategy:  
The trick to this battle is to stay away from the dragon. All his attacks can deal 200+ damage and Wing Breath targets the entire party. The trick is to not quite chain-cast the Exploder spells so damage registers, but the dragon can't do anything. Eight or nine Exploders should do the trick. Don't try to use Magic Absorb - it won't do you a bit of good.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

At this point, your supplies will be running low. Have Flammie fly you to Tasnica and you can restock your inventory. Then fly back to Pure Land. The only downside is that you have to retrace your steps from the beginning.

### Section 3

This section goes through a cave. Don't forget to re-cast Lucid Barrier. When you pass the gate, save your game. Have Sam cast Magic Absorb on an Ice Thug or a Griffin Hand. This should recover all his MP. Hurry through the cave to meet ANOTHER Boss...

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

BOSS! Axe Beak  
Type: Bird  
2800 HP, 99 MP, 27748 EXP, 20400 GP

Abilities:  
FIREBALL Lv.7  
LAVA WAVE Lv.7  
EXPLODER Lv.7  
FIRE BOUQUET Lv.7  
BLAZE WALL Lv.7

Preparations:  
Party's HP is full and Lucid Barrier and Wall are active.

Strategy:  
Very easy fight. Since you can't hit him with weapons, let Sam have fun chilling the heck out of this Boss. About 7 or 8 Freeze Lv.7 spells should do it.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

The party should be around level 60 or 61.

### Section 4

This is a short section. Another spirit requires you to defeat a dragon to gain passage. This section takes you into another cave, where you find the next dragon....

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

BOSS! Red Dragon  
aka Dragon Lv.2  
Type: Dragon  
3000 HP, 99 MP, 29000 EXP, 21000 GP

Abilities:  
FIREBALL Lv.7  
LAVA WAVE Lv.7  
EXPLODER Lv.7  
Fire Breath

Preparations:  
Party's HP is full and Lucid Barrier and Wall are active.

Strategy:  
Just use the same strategy as the previous dragon, except cast Freeze spells rather than Exploder spells.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

### Section 5

This is a very lengthy section, covering more than four large screens.

Re-casting Lucid Barrier helps here because the enemies are strategically placed in each of the screens. At the end of this section comes another Boss....

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

BOSS! Thunder Gigas

aka Gigas Lv.3

Type: Spirit

4462 HP, 99 MP, 30277 EXP, 30600 GP

Abilities:

THUNDERBOLT Lv.7

THUNDER SABER Lv.7

AIR BLAST Lv.7

SILENCE Lv.7

Blitz Breath (This is the bad one)

Preparations:

Party's HP is full and Lucid Barrier and Wall are active.

Strategy:

Geez, I hate this guy for one reason: Blitz Breath! He uses it on Sam and I see an insane 733(!!) damage! As with the dragons, you have to time your spells so that he can't use this. It takes about ten Earth Slide Lv.7 spells to defeat this boss.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

The party should be around level 61.

At this point, retreat back to the Lost Continent (or what's left of it). You should have enough money to purchase three Needle Helmets. This item helps bunches in the Mana Fortress. Then, head for Gold City and buy a Battle Suit if you can raise 30000 more GP. Restock your inventory, heal at an Inn, and save the game. Ride Flammie back to Pure Land (for the third time), retrace your steps back to the fifth Boss arena, and head for the short last section.

Section 6

This section has three areas, including the gate area. You know what that means? You are fighting another dragon!

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

BOSS! Blue Dragon

aka Dragon Lv.3

Type: Dragon

3200 HP, 99 MP, 31570 EXP, 28560 GP

Abilities:

THUNDERBOLT Lv.7

Blitz Breath

Preparations:

Party's HP is full and Lucid Barrier and Wall are active.

Strategy:

Again, the strategy is the same as the previous two dragons, except you now cast Earth Slide. Seven or eight castings and it's over!

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

The party should be around level 61 or 62 now.

Head back to the gate. You now watch an extended cut scene. At the end, you receive the power of the eighth Mana Seed!

Now ride Flammie back to Pandora/Gaia's Navel/Wind Palace and level up all of Sam's and Jenna's magic, as well as their weapons, to level 8. Then purchase what armor you can afford and save the game. Ride Flammie up to the Mana Fortress deck and it begins!

~Mana Fortress~

Outer Deck

No problem, just quickly get to the double doors.

Area 1

At this point, you may want to give Sam the whip, there are a lot of gaps to cross here. Run as fast as you can through this area. Find the next double door, enter, and step on the warp tile within. You will emerge in a Boss arena.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

BOSS! Buffy

aka Vampire Lv.2

Type: Evil

4200 HP, 99 MP, 35686 EXP, 22200 GP

Abilities:

DARK FORCE Lv.7

DISPEL MAGIC Lv.7

ENERGY ABSORB Lv.7

Bite

Hi-Jump

Sleep Ring

Preparations:

Party's HP is full and Lucid Barrier and Wall are active.

Strategy:

This shouldn't be too hard, just use Gem Missile or Burst instead of Lucent Beam. Stay away from the boss and have Sam do all the work.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

The party should be around level 45 or 46.

Section 2

There are a couple of bad paths you can take, but just head straight up for the most part until you reach a Whimper. From there, there is really only one way to go. At the bottom of the long path at the end, there is another warp tile.

It takes you to another Boss.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

BOSS! Dread Slime

aka Lime Slime Lv.2

Type: Evil

5000 HP, 99 MP, 37000 EXP, 26400 GP

Abilities:

Magic Learner Lv.7 (see below)

Preparations:

Party's HP is full and Wall is active.

Strategy:

Whack him with Dark Force for damage and Magic Absorb to recover Sam's MP. The description says the boss has 99 MP, but he really has somewhere around 500. If you cast any other spell on him, he learns it. So don't cast Cure Water when you have Wall on or else he'll learn it at level 7. This boss gets GIANT when his HP is really low, so giant he covers the entire screen!

!!!!!!!!!!!!!!!!!!!!!!!!!!!!

The party should be around level 63.

Section 3

One section seperates you from victory. But the enemies are STRONG! Any party member trapped in a corner by a Master Ninja is good as dead. Just make your way through this long, winding section. The warp tile at the end takes you to another room. Take the other warp tile to meet....

!!!!!!!!!!!!!!!!!!!!!!!!!!!!

BOSS! Dark Lich

Type: Evil

6666 HP, 99 MP, 37000 EXP, 26400 GP

Abilities:

- Freeze Beam                   DARK FORCE Lv.8
  - Petrify Beam                 EVIL GATE Lv.8
  - Sleep Ring                   DISPEL MAGIC Lv.8
  - Confuse Hoops               BURST Lv.8
  - FREEZE Lv.8                 EARTH SLIDE Lv.8
  - ACID STORM Lv.8             AIR BLAST Lv.8
  - CURE WATER Lv.8            THUNDERBOLT Lv.8
- And maybe more...

Preparations:

Party's HP is full and Wall is active.

Strategy:

This takes a while. Repeatedly cast Burst. If you want, try Magic Absorb. You might get something. It's an easy, but long, fight. And I like the music with this battle!

!!!!!!!!!!!!!!!!!!!!!!!!!!!!

The party should be around level 64.

After this fight, the seal on Dryad's Mana Magic will dispel, giving Sam and Jenna enough power to revive Josh's Mana Sword. This is necessary for the final conflict....

!!!!!!!!!!!!!!!!!!!!!!!!!!!!

BOSS! Mana Beast

Type: Dragon

9990 HP, infinite MP, 0 EXP, 0 GP

Abilities:

- Flaming Flight
- Swoop Charge
- WALL Lv.8
- DISPEL MAGIC Lv.8
- LUCENT BEAM Lv.8

Preparations:

Party's HP and MP are full.

Strategy:

The trick to this is to heal just after the boss is ready to charge into you. Do this twice, then use Mana Magic and Moon Energy. This combo will cause 999 damage every time you make contact. Don't charge up your sword. It should only take two cycles to beat him. Now is the time to take your screenshot.

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

Congratulations! You have now completed the Secret of Mana High-Level Challenge. Following this guide will result in a finishing level of 65, which is very good! I think the lowest level you can possibly finish at is around 60 or so.

E-mail me if... Have a hint, spelling errors, or snapshots of the Party's stats.

DO not send junk mail!!!!!!!!!!
