Mission 1

Area 1: Chateau

Harry emerges from the icy waters and onto the Chateau grounds undetected.

"Okay Harry. You've got to attach the modem to the computer upstairs and download the files. The place is swarming with guards, so keep a low profile."

Now the beginning of this level is extremely easy. Just don't shoot anybody at all. Go down and to the right for two clips of ammo and a pistol. Now go up and to the left. Keep going through the path. If you choose to fight your way in, there will be a health pack by the fireplace in the next room. Go to the right of the tables below where the health pack was for some shotgun shells. Now go to the very bottom and go to the bottom left corner below the tables for a shotgun.

Now go to the right and go past the door. Keep going until you reach the wall to the right for some more ammo. Go down and get below the tables that are below you. Grab the key card there. Now go back and go through the door you just skipped. Go through this path and just get to the stairs. There will be a health pack to the left of them if you need them. Just go up the stairs and you will reach the enemies you will actually have to fight.

SECRET Upstairs will be a book shelf to the left. Go behind it from above for a secret area to explore containing a few guards and a lot of weapons.

There will be a guard shooting in all direction to the left. Kill him or avoid him, if you avoid him, he won't chase you. If you want more ammo, go through the first door and kill the two guards. Now go to the right and continue through the corridor. Go down through the next door but make sure to kill the guard standing in front of it. There will be some useful grenades in here that will be covered by another guard.

Get out and continue through the corridor for another guard. Go through the last door and kill the guard that will be shooting at you. Now go above the book shelves and go to the right. Kill the three guards standing there. There will also be more guards walking around at the time. If you want more ammo go down when you get a chance and kill the two guards. Go up the stairs when ready and kill the guard standing there.

Go through the first door for some health and ammo. They will both be covered by guards though. Get out and continue through the corridor for some more guards. Go up the next door you could for some more ammo. Now go into the next room and kill the two guards in there. Grab the extra life and use the computer, to use it just run in front of it. Once you are done using it, more guards will appear.

Continue to the right and there will be a guard running up the stairs. Keep going down the stairs and kill the two guards that will be shooting at you. Go all the way down the stairs and be careful for a guard that will be shooting at you from the right. Go through the door and kill the two guards walking around in here, just make sure to not shoot the civilian. There will also be some ammo to the bottom right of the room.

Keep going into the next room and kill the guard there. Again, make sure to avoid the civilian there. Grab the health if you need it and go to the next room. Go all the way down this corridor and kill the guards. The door on the left will have some ammo being covered by a guard. Go into the door on the right and kill the three guards in here. There will be some shotgun shells in the top left of this room. Go up the stairs when you're ready.

Go to the top right if you want some ammo that will be covered by a guard. Go to the left and kill the next guard. Grab the ammo that guard was blocking and continue to the left through the path. Keep going through the corridor and kill all of the guards. The guard in the top left corner of this whole area will be guarding some health. At the end of the path, go down the stairs. Sneak over to the right and kill the guard before he sees you. Go down and kill the next three guards. Go down and get outside. To the left will be health. Go down and go down the hill.

Area 2: Ski

"I've got all the info downloaded, Harry, but the terrorists are heading for my position. Get down here as quick as you can!"

This area is probably the best in the game just because of how fun it is. Just keep going down and either avoid everybody or kill them. A good strategy to avoid shots are to keep diving as you go all the way down. There will be plenty of ammo and health on your way down. You could also run in between the trees in the middle. That will avoid all enemies except the helicopter. When the helicopter does come, just run side to side and dive to avoid it. Once you reach the bottom, you're done.

Area 1: Mall1

"Aziz is somewhere in the mall, Harry. It's up to you to bring him in. Don't hit any of the civilians!"

Go to the right and kill two guards that will be walking around. When the corridor gets more narrow, a guard will be blocking it. Keep going to the next section and kill the two guards there. Keep going to the right until you get to the escalators. In between them will be a health pack. Now go up th escalator. Kill the guard that will be hiding behind the plants. Go to the top right and kill that guard. Grab the shotgun behind him.

Go to the left, don't go up the escalator because it will only waste your time. Go up the first corridor you can for some ammo. It will be covered by two

guards. Now go down and keep going to the left. Keep going and you will reach a lot of enemies throwing grenades. There will be a lot of items around those enemies so grab what you need and keep going. Go down and to the left. Kill that guard that will be blocking your path.

Kill the two guards in this next area and get to the top. Kill the guard in front of the escalator and he will drop an extra life. Go up the escalator and to the right. Kill the guard throwing the grenades. Go up for some ammo that will be covered by another enemy throwing grenades. Now go down to the bottom and go to the right when you can. Kill those guards and continue through the path.

Keep going and kill the next two guards that will be blocking the corridor. Go up the escalator when you get to it. Go to the right at the top and kill all of the guards you will reach. Go down when you need to and keep killing the guards. Go down the escalator and go to the right. Grab the health if you need it and go up. Go to the right when you can and go to the door at the end of the path.

Area 2: Mall2

Go to the left and kill those guards. Go up after you kill those guards and get ready for a big fight. Kill everybody that comes in and you will have to keep shooting the doors on the stalls. Wait until they break off or people will keep spawning from there. Just keep killing everybody until the doors are all broken and there are no more enemies around and then you will be done with the level.

Go to the left. Go all the way and past the stairs. Get all the way to the very end of this path and grab the keys. There will also be an extra life in the top left corner. Now go back to those stairs you missed and go up them. Grab the mines and keep going around through this path. Go to the very bottom along the left wall and go to the right when there's nowhere else to go. Go up those stairs and keep going up until you reach the next floor.

Immediately grab the shotgun shells in front of you. Now just keep going up until you reach some pyros shooting at you from both sides. Kill both of them for some health and grenades. Now just keep going even further up. Now just keep going up and shoot anybody in your way. Keep going up and run up to the bomb at the top to defuse it.

Area 1: Refinery1

"The refinery is under siege, Harry! Take 'em all out before this place blows sky high!"

Start off by going to the left. Destroy those barrels and grab the hidden shotgun. Now go back to where you started and go up. Go to the left and follow the road. Kill the guards you come across. There will be an opening in the machinery below you, go through it and to the right for some shotgun shells. Now get out and continue up the road. Get to the top and you could go either

way. We'll go right for this walkthrough.

Keep following the road while you go to the right. Stay on the left and pay attention to the pipes on the left side of the road. Go through them when there is an opening and go up. Guarded by two guards will be a gun. Grab that and get back to the road. Continue up it. Follow it to the end and go up. Avoid the flames and get to the top. Go down the next chance you get. Keep going down until you reach the far right. Go up to the top then go to the left. Go into the refinery entrance when you reach it.

Area 2: Refinery2

Go up as far as you can. Go to the left and kill the guard there. Go up when you get as far to the left as you could. Avoid the crushers and kill the guards at the top. Behind the two barrels in the middle will be a health pack if you want it. Now go to the left. Keep going to the left and down when you reach the end. Go to the left again when you get a chance. Keep running to the bottom left wall and you will find a secret area which will contain three hidden clips for the sub-machine gun.

Get out of this secret area and go up. Kill the guards and destroy the barrels in the top right corner. Grab the security pass that was there and go to the left. There's another secret in this wall that will lead you to a health pack. Now get out and go back down. Go to the right and this time go up. Keep going to the right until you reach the crushers on the conveyor belt. Get past them and go through the door at the end.

Keep going down in this new area. Go as far down as possible and then to the right. Go up to a small area and behind some barrels in the top left corner will be another security pass. Now go back to the left and walk on the pipes. Go down this secret room for a flamethrower and some gas for it. Now go back to the door that was after the conveyor belt.

Go to the right and up. Go up whenever you get a chance. There will be a pyro to the left and a barrel behind him. Try to shoot the barrel to kill him and grab the extra life that was there. Now go back down and keep going down to the right. Destroy the three barrels that are right next to each other when you reach them and go up. Go to the far right and continue through this path.

Go down when you reach the split in the path. Keep following this path and don't go up until you absolutely have to. Now go to the right up here and go up. Avoid the crushers and enter the door. Follow this path and avoid all of the crushers when you reach them. Keep going along the path and when there is another split, go down. Keep going and to the left of the crushers will be a secret room that you could enter.

Now just continue through this path. Pay attention to the areas that stick out going down. Avoid the crushers and get to the fifth section like that. Kill the guard and grab the pass. Now go back to the right and go up into the door. Follow this path and get to the far left. There will be another pass here. Now go back to the door and go to the left while avoiding those crushers. Now just follow this path to the end. Kill a lot of enemies and when you kill enough, you'll finish the level.

Area 1: Harrier

This is the most straight-forward and probably the most fun mission to play. All you have to do is move your Harrier jet around and avoid enemy gun fire. You can shoot a machine gun (B) or some rockets (A.) Save your rockets for the trucks and APCs. Just keep killing all of the vehicles and destroy the trucks carrying weapons. The trucks are easy to spot because they have a Nuclear sign on the top of the truck.

Mission 9

Password : KYNCRYM

Area 1: Office1

"Aziz has the last nuke on the top floor of this building. Be careful, Harry! He's holding your daughter, Dana hostage!"

Go to the left and grab ammo behind the crate. Go down when you can and kill the pyro. Go to the left all the way to the end and go up the stairs. Grab the sub-machine gun next to the rolled up carpet in the bottom left corner. Go further down for some health. Now go back down the stairs. Go to the right a little bit and go up. Now keep moving all the way to the top along the left wall. Go to the right when there's nowhere else to go.

Kill the guard to the right and grab the health pack. Now go down and avoid the mines. Enter this next room and kill the guards. Grab the extra life in the top left corner of this room. Now just keep going through this path and kill everybody that gets in your way. There will be some stairs at the end of the path, go up them to get into the next area.

Area 2: Office2

Go to the left and enter the next room. Kill all of the guards here and keep going down. There will be some stairs to the right, all that's up there is an extra life, enemies and a dead end. Go up there if you really want the extra life and go back down the stairs. Go to the left and then up. Destroy the boxes at the top and keep going to the left.

Get in this next room and go to the bottom right corner of it to enter another corridor. Go to the right and up. Kill these guards while you go to the top corridor. Go all the way to the right and kill the guard at the end of the path. Go down and kill the pyro to enter this room. Go to the bottom left of this room and enter that corridor. Now just go to the far right and up those stairs.

Area 3: Office3

Go up and keep going until you reach the top wall. Go to the right and down when there's nowhere else to go. Keep killing the guards and continue to the right from the bottom. Go up for a new area with a lot of guards. The exit of this room is in the top right corner. Go there and get to the top. Go to the left once you reach the top. Go down because behind that guard will be a wall. Go to the left and up. Now go to the left again when you reach the top. Go up the stairs and go up in this new area. Run to Aziz. Kill the guards up here and when you kill the guard with a red suit and two sub-machine guns, you complete the mission.
