## Introduction

The information in this guide is provided as a courtesy from Sarah Shinespark She is the author of the ROM patch "Seal of Rimsala", which can be found over at Romhacking.net. Without her help, this guide wouldn't exist.

With that said, I HIGHLY suggest going over there and checking out her patch! In my opinion, it's the best version of the game available. Hands down.

## Bestiary

NOTE: The values listed below are vanilla, meaning from the unaltered NTSC-U\_C version. The Seal of Rimsala patch made several changes and fixes, but only the new enemy names are included here.

Additional information, most are courtesy of *Sarah Shinespark*:

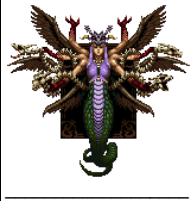

- The Mimic enemy is not used in the vanilla ROM but DOES have a sprite and attack animations. It will require hacking to battle him.
- The last Medusa enemy is supposed to have the Medusa flag but instead, they flagged the enemy next to them in the ROM (Bali).
- If a weapon has the same race flag as an enemy, it's supposed to do more damage.
- Likewise, armor with the same race flag is supposed to reduce damage.
- Rimsala (2) is missing the top design of her background card portrait, for some reason. For this FAQ, I have added it back in.
- Red/Blue Guardians & Tiamat do not have any enemy data, that are known of. The player never actually battles them during the game.
