Holding the Nintendo 64 Controller

By holding the controller like this, you can operate the Control Stick freely with your left thumb. Using your right thumb, you can easily access A, B or C Buttons. Use your left index finger to operate the Z Button on the back of the controller and your right index finger to operate the R Button on the top.

While playing Star Soldiers, we recommend you use the hand positions shown above.

CONTROL STICK FUNCTION

The Nintendo 64 Controller contains a Control Stick which uses an analog system to read the angles and direction of its movement. This allows subtle control that is not possible using the conventional + Control Pad.

When turning the Control Deck power ON, do not move the Control Stick from its neutral position on the controller.

If the Control Stick is held at an angled position (as shown in the picture on the left) when the power is turned ON, this position will be set as neutral. This will cause games using the Control Stick to operate incorrectly.

To reset the neutral position once the game has started, let go of the Control Stick so it can return to its center position (as shown in the picture on the left) then press START while holding the L and R Buttons.

The Control Stick is a precision instrument, make sure not to spill liquids or place any foreign objects into it.

THE YEAR IS 2098 AD

Story (pg. 5)

In the year 2092AD, the human race faced a threat to its very existence, at the hands of the beings known only as the Zeograd...

But even in the face of the overwhelming Zeograd forces, Earth's defenders, the SIA (Special Interception Airforce) did not consider surrender. Launching a counterattack, they dispatched their finest unit, the F92 Soldier Blade, to the front lines. After punching its way through to the enemy base of operations, the F92 Soldier Blade succeeded in defeating the leader of the Zeograd forces, the Duoss Core 3.3C - but not without a price. The F92 Soldier Blade was nearly destroyed and rendered inoperable in the fight. However, the SIA retrieved the F92 Soldier Blade's black box and returned with it to Earth, in order to study the combat data recorded there.

Peace returned once more to the Earth...

However, even though the Duoss Core 3.3C and its army had been defeated, the threat from the Zeograd was far from over...Indeed, an awful truth lay concealed within the black box: the Zeograd were not simply an alien race - they were a society of highly advanced sentient machines!

Preparing for another attack by the Zeograd, the SIA used the data recovered from the F92 Soldier Blade battle records to build three new fighters, dubbed the F98 Series.

The year is 2098, and the Zeograd have launched their second attack on the human race...Can the SIA stop them once again?
