THE RISE OF SIN TZU

OVERVIEW

It's a bad night in Gotham City. There's been a full-scale breakout at Stonegate Prison and Arkham Asylum has been overrun by Gotham's newest super villain, Sin Tzu, in search of a worthy adversary. Sin Tzu has targeted Batman and has made Gotham City the battleground. Using his Mehta-Sua energy, the ancient power to control mind and body, Sin Tzu has rallied Bane, Scarecrow and Clayface to help him bring Batman to his knees. Batman must clean up the streets of Gotham City that are rampant with criminals and make his way into the bowels of Arkham for his final confrontation with Sin Tzu.

MISSION OBJECTIVES

Batman, aided by his partners, Robin, Nightwing, and Batgirl, must battle his way to the end of each level to reach the Level Complete checkpoint. Each level has a specific sub-objective that needs to be completed: rescuing civilians, diffusing bombs, mini beat'em ups or protect the doors.

You will play as one of the four heroes and start your journey in Crime Alley, where it all began for Batman following his parent's murder. Use your hero's extraordinary martial art abilities in order to fight your way through your objectives and earn points to purchase new moves or unlock areas of the Bat Museum.

THE HEROES

Choose to play with 4 different controllable characters: Batman, Robin, Batgirl and Nightwing.

BATMAN

Batman is an incomparable athlete skilled in virtually all forms of physical combat. Moreover, he is an amazing detective, a brilliant escape artist, and a master of disguise and deception who plots his war on crime within the Batcave, the cavern headquarters that lie beneath Wayne Manor. Batman never goes into action without his utility belt, which contains a wide array of devices such as lasers, gas pellets, silken ropes, and Batarangs. His primary mode of transportation is the sleek and silent Batmobile.

ROBIN

Robin is now Tim Drake, a thirteen year-old street kid adopted by Bruce Wayne. Abandoned by his callous parents, Tim was forced to live on his own. A great admirer of Batman and Robin, Tim tried to act as brave and tough as his heroes. Admiring Tim's courage and fighting skills, Batman took him under his wing and a new Robin was born. Tim feels he has to "earn his place" at Batman's side and wants to prove he's all the hero the previous Robin was and then some. Robin's attack is very fast but he inflicts less damage than Batman or Nightwing.

NIGHTWING

After college Dick Grayson left Gotham City to travel the world on his own. He realized he had outgrown the role of Batman's trusted kid sidekick Robin, and set about developing a new heroic persona all his own. Now in his new identity as Nightwing, Dick still teams up with his one-time mentor, but Batman often finds his one-time partner has new, and in some cases radically different crime fighting ideas of his own. Nightwing is much stronger than Robin or Batgirl but his attack speed is a little slower.

BATGIRL

Barbara Gordon is the daughter of police commissioner James Gordon. By day she works for the police department, by night she battles the underworld as Batgirl. When Dick Grayson left Gotham, Batman found himself calling on Batgirl to work with him on special cases. Her double life as Batgirl sometimes puts Barbara at an emotional crossroads. Barbara believes the good she does as Batgirl is worth the potential risk to herself and her father. Batgirl's attack is very fast but she inflicts less damage than Batman or Nightwing.

THE BOSSES

The heroes will face tough opposition in:

SCARECROW

Ex-college professor Jonathan Crane was always fascinated in the use of fear to trigger obedience in test subjects. Embittered at being derided for his theories and fired from his job, Crane now dresses in the macabre rags of a scarecrow and uses his fear-inducing chemicals to force innocent people to bow to his will. His control over human fear has increased, giving him not only the power to induce it, but also to take it away. Beware of Scarecrow's Fear Effect. The Scarecrow has a new, horrifying look, to complement an increased arsenal of chemical weapons.

CLAYFACE

Turned into the villain Clayface by mysterious chemicals, the creature once named Matt Hagen, is bulkier, stronger, and meaner than ever before. And he's got a new trick up his "sleeve", now able to split his mass into separate entities, and send multiple "clay people" off in different directions to do his felonious bidding.

BANE

Bane is a cunning mercenary from South America. A trained killer and a brilliant military strategist, Bane was turned into an unstoppable super-soldier during an experimental operation that implanted tubes into his brain. Through these tubes he can inject a steroid-like chemical called "Venom" directly into his blood stream and increase his strength and body mass at will.

SIN TZU

Sin Tzu is the most brilliant and methodical of all of Batman's foes. He is an arrogant conqueror who prides himself in conquering worthy opponents who have never been beaten before. Sin Tzu is a strategist and warrior, not a despot. After accomplishing his objectives in warfare he will vanish from the scene and give no heed to the chaos that follows. Always on the lookout for a worthy adversary, Sin Tzu heard legends of the Batman and set out to Gotham City to defeat him on his own turf and terms. As well as a being a grand strategist, Sin Tzu is a master martial artist. He is more than a match for the Caped Crusader in one-on-one combat. Beware of Sin Tzu's Mehta-Sua.
