

The background of the entire page is a dark, space-themed image. On the left, there's a close-up of a red, crystalline or cellular structure. In the center-right, there's a glowing purple and blue nebula or energy field. Overlaid on this is a circular frame containing a fiery, orange and red figure that looks like a character or a creature. The word "EXTERMINATION" is written in large, white, blocky letters across the middle of the image, with a small trademark symbol (TM) at the end.

Dennis is equipped with a Special Purpose Rifle 4 (SPR4) assault rifle and combat knife. He must learn to select the optimum weapon and aiming mode for each situation. (See p. 11 for SPR4 usage information.)

Knife >

Dennis can attack with the knife in two ways: a strong slash  and a standard slash . The strong slash is slower and will leave you more open to a counterattack. The standard slash inflicts less damage, but it strikes much faster and can be used for a 3-strike attack.

Note: The combat knife can be used an unlimited number of times and its use extends beyond attacking.

Special Purpose Rifle 4 (SPR4) Assault Rifle >

The SPR4 is a fully customizable assault rifle. This customization allows for strategic planning, as well as variety in attacks. Determining which weapon works best to eliminate each creature is crucial to success.

(See pp. 12 - 13 for customizing instructions.)

Auto-Targeting / 3rd-person View >

Pressing the R1 button allows Dennis to Auto-Target the nearest creature from a 3rd-person viewpoint. Dennis remains in view and the surrounding environment remains in sight at all times. This view still allows him to evade attacking enemies and eases targeting enemies that are not grouped together.

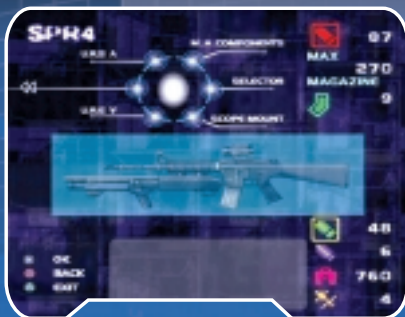

Manual Aiming / 1st Person View >

Pressing the R2 button allows Dennis to manually aim from a 1st-person viewpoint.

Auto-Targeting is lost, but manual targeting is more precise for shooting at inanimate objects (boxes, locks, etc.). In this view, only Dennis' gun barrel can be seen. This allows for a more detailed view of the area Dennis is facing. But the limited view hinders Dennis from seeing any oncoming attackers.

Custom Parts Classification >

Each custom part can be attached to only one part of the SPR4.

- 1 Upper U.R.S.: Upper Universal Rail System location of the rifle
- 2 Lower U.R.S.: Lower Universal Rail System location of the rifle (secondary weapon)
- 3 Scope Mount: Scope/sight
- 4 Selector: Switch for selecting the firing mode - Single Fire or 3-Point Bursts
 - M.A. Components: Multiple Attachment Components use more than one attachment location when equipping. Once equipped, one less attachment location on the SPR4 is available.

Use the left analog stick or directional buttons to highlight the portion of the SPR4 to be modified. Press to display the available parts that can be attached. Highlight the part and press to equip it.

Examples of Custom Parts >

The following are examples of the SPR4's custom parts.

U.R.S. Cover (Upper U.R.S.)

The stock Universal Rail System cover of the SPR4 assault rifle.

Tactical Grip Unit (Lower U.R.S.)

A vertical fore-grip with an integrated tactical light. Press while aiming to turn the tactical light ON/OFF.

Shotgun Unit (Lower U.R.S.)

Fires a single 12-gauge shotgun round using the U.R.S. trigger.

Zoom Scope (Scope Mount)

Variable magnification scope. Zoom in with the L1 button and zoom out with the L2 button.

Pressing  allows Dennis to perform a variety of actions. The action is dependent upon the situation. The following is a list of these actions:

Acquiring and Using Items

Pressing  in front of an equipment box, item, switch, etc. allows Dennis to acquire/use the item.

Jumping

Pressing  near the edge of a crate, facility ledge, etc. makes Dennis jump forward. Running before the jump extends Dennis' jumping distance.

Climbing and Swinging

Pressing  near a ladder or overhead bar makes Dennis grab onto the equipment. Once latched onto the ladder or bar, Dennis can move with the left analog stick or directional button.

Note: On some ladders and overhead bars, Dennis can reach for and grab other nearby overhead bars. Move in the desired direction and press .

Also, when Dennis is swinging at the end of the overhead bars, pressing  and forward will make Dennis release his grip on the bar and swing forward.

Rolling/Evading Attacks

Pressing  in conjunction with the left analog stick or directional buttons near larger creatures will cause Dennis to evade the enemy by rolling in the desired direction.

Shake Off Enemies

If a creature latches onto Dennis, repeatedly pressing  will help Dennis to break the creature's hold. Press  in conjunction with the left analog stick or directional buttons to increase Dennis' chance for escape.

Crawling Into Vents

Pressing  near a vent makes Dennis crawl into the ventilation shaft. Once inside the shaft, pressing forward will make Dennis crawl forward. To exit the shaft, find a shaft opening and press forward.

Infection >

When attacked by creatures, Dennis' immunity to the virus weakens. Once the Infection level reaches 100%, his body enters a "pre-mutation" state as the virus attacks his bloodstream and causes a glowing "core" to explode from within and onto his back. While in the pre-mutation state, Dennis' health will drop to a maximum of 68. If the Infection is left untreated, the virus will overtake Dennis' body, mutate him into a "creature" and he will die. Dennis' Health and Infection levels can be monitored on the Main Menu. (See p. 28 for more information.)

Note: The virus can infect inorganic matter as well. Once infected, the material becomes "alive" and will stop at nothing to spread the virus.

Recovery >

In order to replenish your health and reduce your Infection level, you must find and administer various healing items. The Recovery Units and Booster Shots will partially recover your health and reduce Infection, but for full recovery, the MTS Vaccine and MTS Bed are required.

**MTS (Medical Treatment System) >**

Located in limited quantities and hidden throughout Fort Stewart, the MTS Vaccine can replenish your health to 100 and reduce your Infection level to 0%. But because of its limited numbers, use it wisely.

The MTS is a medical device for treating infection and injuries. It is located in select areas throughout Fort Stewart. To use the MTS, the MTS Vaccine is required. Press  in front of the MTS operation panel to receive treatment. Once the treatment is initiated, Dennis' Health is restored and his Infection level is reduced to 0%. This device is crucial to Dennis' success and survival.

**ITEMS**

Many items can be found throughout the facility. To collect an item, stand in front of the item and press .

Using Items

To use most items, such as recovery items and data files, access the Main Menu and select the Item Screen. (See pp. 22 - 23 for information regarding the Item Screen.)

Event Items (items needed to complete certain events), such as keys, can be used without accessing the Main Menu. Once collected, they are automatically used when  is pressed in the predetermined location (such as in front of a door).

Maps

Portions of the facility's map are posted on walls throughout the base. To view the Map, access the Main Menu and select the Map Screen. Highlight the desired portion of the Map to view and press . Once selected, you can pan around the Map with the left analog stick or directional buttons. To zoom in and out of the Map, press the R1 and R2 buttons respectively. (See p. 21 for information on accessing the Map Screen.)

**Files and Memos**

Various documents written by the staff remain in the facility. In order to understand the history of the facility and the cause for its deterioration, it is essential to collect and read these documents. Required documents can be read using the Database Screen in the Main Menu. (See p. 21 for information on accessing the Database Screen.)

Save Terminal >

(PSTS – Personnel Status Tracking System)

To save your current game progress, Dennis must access a Save Terminal (PSTS). While in front of the Save Terminal, pressing  accesses the Save Screen. Select the MEMORY CARD slot in which the memory card (8MB) (for PlayStation®2) is inserted. Then, select one of the five locations to save to (you can save five files per memory card (8MB) (for the PlayStation®2)).

Note: The Save Terminal requires 2 units of battery power to operate. If less than 2 units are available, the game cannot be saved. Also, when saving the game for the first time, ensure that the memory card (8MB) (for PlayStation®2) has 88KB of space or more available.

Battery Pack >

Throughout Fort Stewart, Dennis will encounter electronic equipment, such as elevators and Save Terminals, that require Battery Pack units before operation. Once a Battery Pack unit is found, pressing  in front of this equipment allows Dennis to use the Battery Pack power to operate the equipment. Battery Packs can be recharged using the Battery Recharger.

Note: Each piece of equipment requires a different number of Battery Pack units. Dennis finds 8 Battery Pack units at the start of the game, but more can be found throughout Fort Stewart.

Battery Recharger >

To recharge the Battery Pack, stand in front of the Battery Recharger and press .

Note: There is no limit to the number of times a Battery Pack can be recharged, nor is there a limit to the number of recharges a Battery Recharger can execute.

Ammo Depot >

Dennis can replenish his supply of bullets for the SPR4 assault rifle. To use the Ammo Depot, press  in front of the Ammo Depot control panel and select “Yes”.

Doors >

There are 5 different types of doors throughout the facility – Standard, Padlocked, Blocked, Electronically Controlled, and Sealed doors.

Standard Door - Simply press  to open it.

Padlocked Door - The padlock needs to be removed prior to opening.

Blocked doors - Can only be opened once the obstruction is cleared.

Electronically Controlled - These doors require card keys, passwords, etc., to be opened. Locked doors will be signified with a “red” lamp above. Unlocked doors have a “green” lamp above.

Sealed Doors - These doors cannot be opened because of immovable objects in front of the door, infection or unavailable card keys.

Main Menu >

Pressing the START button or  displays the Main Menu. The Main Menu allows you to view Dennis' Health, Infection, SPR4 status and acts as the hub to view important information such as Items and Documents collected.

Main Menu Screen >

The following information is displayed on the Main Menu:

- 1 **Battery:** Capacity and current power available in the Battery Pack
- 2 **SPR4:** Status of the SPR4 (assault rifle) and its remaining ammunition
- 3 **Health:** Indicates Dennis' current and maximum Health level
- 4 **Infection:** Indicates the Infection level of Dennis' body
- 5 **Navigator:** Access the MAP, SPR4, DATABASE and ITEM Screens

Navigator >

Using the left analog stick or directional button, you can access the MAP, SPR4, DATABASE and ITEM Screens. After highlighting the screen to display, press  (Press  to return to the Main Menu).

MAP Screen >

Access this screen to view all collected maps. (See p. 17 for instructions on viewing the Maps.)

SPR4 Screen >

Customize the SPR4 (assault rifle) with collected attachment parts. (See pp. 12 - 13 for more information.)

Database Screen >

Read collected Files and Memos. Press left or right to select the category and up or down to highlight the file. Press  to open the file/memo. (See p. 17 for more information.)

Item Screen >

Review and use collected items. (See pp. 22 - 23 for more information.)

Item Screen >

Item Classification

Items are classified into the following categories.

- 1 Event Items:** Items to use only in predetermined locations (i.e. card keys).
- 2 Healing Items:** Items to recover Health/reduce Infection (i.e. MTS Vaccine).
- 3 Equipment Items:** Items automatically used at a specific location (i.e. suspension harness).
- 4 Battery Items:** Status of the Battery Pack (See p. 18 for more information).

Display Items

Use the left analog stick or directional button to highlight the desired item category. Once highlighted, press  to display the list of items in the selected category. Press  to return to the previous menu.

The following is a walk-through of the first area. Use this RECON Training to familiarize yourself with some of Dennis' abilities. Also, remember to explore areas not covered in this walk-through for important items.

1. Acquire the battery pack >

After receiving instructions from Roger, you need to activate the elevator. First open the item box next to the elevator by pressing **X** when standing in front of the item box. Collect the Battery Pack.

2. Activate the elevator >

With the Battery Pack collected, stand in front of the elevator's Battery

Power Source located on the left of the elevator entrance. Press **X** to place the Battery Pack units into the Power Source. Walk into the elevator and stand in front of the operation panel. Press **X** to set the elevator into motion.

3. Climb onto the ledge >

After exiting the elevator, Dennis must climb up to the ledge above the crates. Press **X** in front of the crates to climb up to the ledge. Once on the ledge, collect the Health Item inside the item box. Slide down the slope and collect the Map on the facility wall. Run towards the gap, just past the fallen electrical tower.

4. Use the vehicle to cross the chasm >

To cross to the other side of the chasm, you have to use the vehicle that is wedged between the chasm walls. Acting as a bridge, step onto the vehicle, but beware. Dennis' weight will cause the vehicle to shift and fall deeper into the gap. Immediately press **X** to jump from the vehicle. If you remain on the vehicle as it slides down, don't panic. The vehicle will stop moving. Press **X** in front of the walls to climb out.

5. Cross the pipe >

Climb up the first set of ladders to talk with Roger. He'll direct Dennis to walk across the pipe. Take caution and be careful not to fall off the pipe. Slightly move the left analog stick to make Dennis walk. Also, adjust the camera view by pressing the L1 button.

6. The final steps >

The last two jumps require Dennis to get a running start. Run towards the edge and press **X** as Dennis gets near the edge. Dennis will jump across to the other platform.

7. Enter the fan shaft >

After reuniting with Roger, listen to his warnings and enter the fan shaft. Fort Stewart lies at the bottom of the shaft.
