EDWARD ELCRIC

A fifteen-year-old prodigy who became the youngest State Alchemist in history. His alias, "Fullmetal," derives from the fact that his right arm and left leg are metallic, artificial limbs known as automail. He and his younger brother Alphonse are on a journey to find the Philosopher's Stone, which may hold the power for them to regain their bodies.

**ALPHONSE ELCRIC**

Inside the giant suit of armor is a soul of a fourteen-year-old boy with a gentle heart. He journeys with his older brother Edward in hope that the both of them will regain their original bodies. Always calm and stable in character, Al is the one who chides Ed, who is quick to lose his cool. Al is Ed's perfect companion.

ARMONY EISELSTEIN

Wilhelm Eiselstein's daughter. Wilhelm has forbidden her from learning alchemy on the basis that she has no talent. She believes her father is harsh on her because she is inept at the ancient science. To gain recognition from her father, she becomes an apprentice to Edward.

CAMILLA

A mysterious woman dressed in black. Old records describe her as a legendary alchemist who disappeared several decades ago...

PROFESSOR WILHELM EISELSTEIN

One of the Ten Alchemists, and a renowned authority on catalytics, the study of making alchemy more efficient. He is now conducting research on the Philosopher's Catalyst, a legendary material comparable in power to the Philosopher's Stone. When the town of Hiessgart came under the attack of chimeras, he brought the refugees to safety and led the efforts in building New Hiessgart.

ALEX LUIS ARMSTRONG

A major in the military. He is capable of fancy footwork despite his hulky physique. His giant knuckles enable him to perform powerful alchemy, for which this State Alchemist has been given the alias "The Strong Armed Alchemist."

BRIGADIER MUDI NEMDA

Chief of the military police in the Hiessgart region. Tenacious in expanding his own power, he has almost completely privatized the army. His ambition is to build his own Nemda Kingdom.

ROY MUSTANG

A military colonel and State Alchemist who goes by the nickname "The Flame Alchemist." His gloves are made of pyrotex, which he uses to create alchemy-controlled flames.

SENIOR COLONEL GENZ BRESSLAU

A military policeman who proclaims himself to be "The Armor Piercing Alchemist" and the strongest in the military. He has no interest in rank or honor; his only pursuit is his own physical strength. He is quick to anger, and shows no mercy for subordinates who fail in their duty.

RIZA HAWKEYE

A military lieutenant, and a close aide to the Colonel. A woman highly capable in any assignment, she is secretly feared by her peers for her imperturbable manner.

Edward Elric and his younger brother

Alphonse made an attempt at human transmutation, a forbidden act in alchemy, to revive their deceased mother – but the results were tragic...

...Edward lost his left leg, while Alphonse lost his entire body.

Edward was able to sacrifice his right arm to transmute his brother's soul and bind it to a suit of armor – but the price the brothers paid was far too great.

To regain their bodies, the brothers have started on a journey in search of the legendary Philosopher's Stone, which is said to hold immeasurable powers...

1. Character Display – Ed's facial expression changes as his HP decreases, while Al starts flashing red as his HP decreases.
 2. HP Gauge – This gauge indicates Ed's HP. HP decreases when damage is received.
 3. Frenzy Gauge – This blue gauge charges with every attack on your enemies. When the gauge becomes full, the HP gauge will start shining in rainbow colors to indicate that a Fighting Frenzy has been activated. While in a Fighting Frenzy, your ATK increases, and you gain more EXP points.
 4. Alchemy Gauge – You can transmute objects while the gauge is blue or pink.
 5. Special Attacks Stock – Icons of Al's face indicate your stock of special attacks.
6. Map – You can check your current location on the map. Press the L2 button to toggle between a zoomed in map, a map of the entire area, and no map. Red indicates Ed's location; blue indicates Al's location. White dots indicate enemies, yellow stars indicate Save Points, ladders are shown in brown, and the door or area you entered from is indicated by "IN."

SAVE POINTS

Enter a Save Point (inside the shining circle) and press the **△** or **○** button to save your game and/or recover your health. You will need a memory card (SMB) (for PlayStation 2) with at least 226KB of free space to save your game.

GAME OVER

You can also jump on top of a Rockblocker (or push the left analog stick in the direction of a Rockblocker) to use it as a foothold for accessing higher areas. In the beginning, you will only be able to transmute one Rockblocker at a time - the first one will crumble as you make a second one. As Ed levels up, you will gain the ability to make up to three Rockblockers at a time.

Charge the Alchemy Gauge to...

Attack with Stonespikes!

Hold the  button to charge the Alchemy Gauge, then release to transmute a Stonespike, which will damage nearby enemies. **TRANSMUTE WEAPONS FROM OBJECTS**

When you hold down the  button to charge the Alchemy Gauge, you will see shining Alchemy Circles around objects that you can transmute. Charge the Alchemy Gauge and release the  button while inside the circle to use alchemy.
