Does U-I have the courage to save his planet and his people? And himself?

Your Power Gauge

Phase

Shows the current phase you are in. This is very important! We'll go into more detail on each phase on page 11.

PLAYING GITAROO

BLUE ZONE and PHRASE BAR

Tilt the left analog stick all the way to one direction to show the fan-shaped Blue Zone. The pink bar is called Phrase Bar. The small blue circle in the center is called Attack Point. Press and hold down the  button when the  in the Phrase Bar is about to overlap the Attack Point. When the Phrase Bar is about to end, release the  button. Make sure to follow the Trace Line with the left analog stick.

GUARD

Guard Marks, the , , , and  symbols move in from four directions. As they reach the center, press the corresponding button.

Note: Only during the Guard phase do you need to match the buttons with the corresponding symbols on screen.

ACCURACY

The level of accuracy in playing Gitaroo is categorized to GREAT, GOOD, OK, and MISS. It's the timing you press a corresponding button when it overlaps the Attack Point. You get a higher score when you get more GREATs.

Your total score will be displayed after you clear a stage. It shows the total points you earned during the game and gives you a ranking based on how many of each GREAT, GOOD, OK, and MISS you got.

CHARGE, BATTLE, & FINAL PHASES

A tune is made up of three phases, Charge, Battle and Final.

CHARGE PHASE

The Charge is the phase when you can gain power. The better you play, the more power goes into the Power Gauge. If your timing is off, or if the Trace Line goes out of the Blue Zone, you won't gain power.

BATTLE PHASE

In the Battle phase, there's Attack mode and Guard mode; you alternate between them.

In Attack mode, lay down the hottest riffs you can. The better you play, the more damage your opponent takes. If you mess up, then you are the one who takes the damage.

In Guard mode, the key is to dodge your opponent's attacks. The controls work a little different in Guard mode. Follow the directions in **GUARD** on page 10. If you guard successfully, your damage is zero. If you don't, you lose power.

FINAL PHASE

If you've reached Final phase, you are almost to the victory. Your opponent's been weakened; so attack, attack! But also keep an eye on that Power Gauge! The first one to run out of power loses.

VS MODE

You are able to play up to 4-players in VS Mode.

STAGES

You can unlock more VS Play stages by clearing Single Play stages. Player 1 selects a stage to play using the up and down directional buttons and press the **X** button.

Now each player can choose a character using the left and right directional buttons. Press the **X** button to confirm. Finally, set the Power Gauge bar to desired amount using the up and down directional buttons. The bar moves from 10% to 100%. Default is set to 20%. Bring it all the way up to 100% if you are beginner Gitaroo player. The VS battle begins when each player press the **X** button to confirm the settings.

VICTORY CONDITION

Play a tune alternately with your opponent(s). VS Play works basically the same as Single Play. The battle ends when either player's Power Gauge reaches zero. When you battle through the entire tune, whoever has more power at the end wins.
