THE JUSTICE LEAGUE

Military robots run amok at a high-tech research facility in the financial district of *Metropolis*. Extra-dimensional monsters take over a top-secret Arctic Communications relay facility. A missile base is attacked by super-powered criminals who have never before worked together. And deep beneath the surface of Mars, dozens of alien warriors are released from their long imprisonment.

These seemingly unrelated events prove to be multiple pieces of a single master plan devised by one mind.

Opposing this "mind" is the combined force of the *World's Greatest Super Heroes*:

- SUPERMAN, the *Man of Steel* and the standard by which all other Heroes are measured;
- BATMAN, the *Dark Knight Detective* who has trained himself to the physical and mental peak of human ability;
- WONDER WOMAN, princess of a race of Amazons, warm and wise but also the fiercest warrior on the team;
- THE MARTIAN MANHUNTER, last survivor of his home world, gifted with a seemingly endless array of superpowers;
- THE FLASH, the *Fastest Man Alive*, capable of running at speeds faster than light;
- GREEN LANTERN, wielder of the awesome Power Ring, the most powerful weapon in the universe; and
- ZATANNA, the beautiful mistress of the mystic arts.

Together they are the JUSTICE LEAGUE. From "the Watchtower," their headquarters on the surface of the moon, the Justice League stands vigil over the Earth, protecting her people from threats large and small.

This latest threat will prove to be the League's greatest challenge ever!

THE HEADS UP DISPLAY (HUD)

HERO HUD

The Hero HUD provides real-time information on the Heroes' general status.

EXPERIENCE METER

The Experience Meter shows how close a Hero is to obtaining the next level. Experience is gained by defeating enemies and collecting the Experience Orbs that fall from them. When the Experience Meter is full, the Hero levels up, gaining one or two skill points (depending on the Hero's current level), which can then be used to increase a power. (See page 19 for more details.)

HEALTH & POWER METERS

The orange Health Meter shows how much more damage the Hero can take before going unconscious. The blue Power Meter shows how much energy the Hero has left to spend on using his or her special superpowers.

HEROIC METER

The Heroic Meter increases as the Heroes flawlessly deal out damage to their enemies. Bonuses are awarded when the meter is full, signalling a Heroic attack. The Heroic Meter is filled by delivering complex combinations — simple punches or superpowers will fill the meter but will take much longer. The Heroic Meter is drained if the Heroes receive any damage.

MESSAGES

Text below the HUD gives messages about pick-ups and possible actions.

ENEMY HEALTH METER

The Enemy Health Meter (located at the bottom of the screen) shows how close the Heroes are to defeating their current enemy.

ATTACK STATUS

In single-player mode, you can set your partnering AI Hero's attack status, choosing from:

-  *Normal* (directional buttons ↓)
-  *Offensive* (directional buttons →)
-  *Defensive* (directional buttons ←)

MAPS

You can view the map by pushing in the **R3** button (push in right analog stick). Push the button repeatedly to toggle between large view, small view, and off.

THE STATS SCREEN

Press the **SELECT** button to access the Stats Screen for the Hero you are currently controlling. To swap Heroes while in the Stats Screen, press the **□** button.

- In two-player games, if either player presses the **SELECT** button, the game will pause and the Stats Screen will be displayed. The screen is divided vertically, displaying stats for both Heroes. Both players can simultaneously make any changes desired to the Heroes' attributes in this screen.
- In single-player games, you can only see one Hero's stats at a time on the Stats Screen.

POWERS

As your Heroes gain in levels, they accumulate skill points that can be used to augment their existing superpowers or even gain new ones. Use the left analog stick or directional buttons to scroll up and down the Powers Menu to see your options.

At the bottom of the screen, you'll see a description of what the highlighted power does. For a more information about the power, press the **R1** button. Press the **X** button to assign a skill point to a power.

BOOSTS

Boosts are tokens you collect that allow you to augment a Hero's powers. They generally appear over the body of a defeated enemy. Once collected, they can be viewed and assigned in the Heroes' Stats Screens. Assigning a Boost to a power can make it more efficient, stronger, faster or longer-lasting. The more powerful the Boost, the more the superpower will be augmented.

To boost a Hero's power, use the left analog stick or directional buttons to highlight the power you want to enhance, then press the **○** button.

You are then taken to the Boost Screen where you can view all Boost details for the selected superpower.

Use the left analog stick or directional buttons to highlight the Boost you want to slot, and press the **⊗** button to confirm. Once confirmed, the Boost will increase that character's superpower permanently. If you replace it with a different Boost, the original is lost, and the new Boost takes effect.

The Boost system is designed to be flexible so that you can experiment and explore various Boost configurations.

Note: Once you assign a Boost to a slot and confirm, the Boost is permanent. You cannot then reassign that Boost to another slot. However, you can overwrite Boost slots. For example, after assigning an Endurance Boost to a slot, you can overwrite this Boost with a Damage Boost.

The Boost Stats Screen allows you to manage your collected Boosts before you assign them to your Hero's superpowers. From the Boost Stats Screen, you can select a Boost and choose to combine it with other Boosts to make it more powerful. (See *Combining Boosts* on page 22 for details.)

There are six types of Boosts, and each one affects a power in a different way. The types are:

- **Damage** — Increases the damage inflicted by the Hero on an enemy.
- **Efficiency** — Decreases the power cost of each superpower.
- **Range** — Increases the range or area of effect of a Hero's power.
- **Luck** — Increases the probability of a critical hit (bonus damage) or, if assigned to a defensive power, a greater chance to evade an attack.
- **Speed** — Decreases the recovery time needed between special powers.
- **Duration** — Increases the duration of the power or stun effect.

Boosts come in different qualities, from 1 to 7. In the beginning of the game, you will only find lower quality Boosts. As you progress, you will find increasingly better Boosts that you can use to upgrade your Hero by replacing existing Boosts.

Boost properties may change depending on the power into which you slot a Boost. Pay close attention to the information displayed at the bottom of the screen when slotting a new Boost.

COMBINING BOOSTS

In the Boost Stats Screen, you can combine three Boosts to receive a new one. The resulting Boost will always be one of the six main types of Boosts. The highest quality Boost in the game is 7.

To combine Boosts, use the left analog stick or directional buttons to highlight the Boosts you want to combine, and press the **X** button to select them. Once you're selected three Boosts, press the **Y** button to combine them into one new Boost.

Of the original three Boosts, the highest-quality Boost will determine the Boost type of the newly combined unit. If there is a tie for highest quality, the new Boost's type will be randomly chosen from the Boosts of equal quality.

You can then assign the newly created Boost to the superpower you want to enhance in the Powers Menu. (See *Powers* on page 19 for details.)

BIO

The Bio Screen provides information on stats, experience, level, health and energy, as well as providing a bio on the selected Hero.

LOG

The Log provides details on items you collect throughout the game. Specifically, you can view the number of shields you've collected and use them to purchase unlockable Heroes and costumes.

PUZZLES, POWER-UPS & BOOSTS

PUZZLES & DOORS

Scattered throughout the game are various doors and puzzles that require you to push a sequence of buttons in a certain order to unlock or solve them. When the Hero gets near one of these puzzles, a prompt will appear at the bottom of the screen, asking you if you're ready to start. Press the **Y** button to pop up a graphic showing the sequence of buttons you must press in the order shown. You have a limited time to enter the correct sequence, or you fail the puzzle.

EXPERIENCE ORBS, POWER-UPS & BOOSTS

Experience Orbs, Power-Ups and Boosts are collectible tokens that are generally dropped by defeated enemies during combat. These help the Heroes gain strength and remain healthy when the going gets tough.

EXPERIENCE ORBS

All enemies drop Experience Orbs when defeated. To gain experience, the Heroes must gather these orbs before they fade away. Luckily, these orbs have a slight magnetic quality that automatically attracts them to Heroes, making it easy for the Heroes to sweep them up without much effort.

POWER-UPS

Power-Ups provide immediate boosts to a Hero's Health or Power Meter.

- *Health Power-Up* — Heals the Hero's health to 100%.
- *Energy Power-Up* — Refills the Hero's energy to 100%.
- *Dual Power-Up* — Heals the Hero's health to 100% and refills the Hero's energy to 100%.

BOOSTS

Boosts are items you can collect to increase a Hero's powers. Once collected you can view and assign them in the Heroes' Stats Screens. (See page 20 for more information on how to use Boosts.)
