# In Memory of Owen Hart

The World Wrestling Federation and Acclaim Entertainment would like to dedicate **WF ATTITUDE™** to the memory of Owen Hart. Owen loved the wrestling business and lived to entertain both in and out of the ring. He was a consummate performer and a very special human being. If the legacy of a man's life is measured by the lives he touched and how much he is loved...then a big piece of Owen Hart will live on in all of us.

**Owen James Hart**

**May 7, 1965 - May 23, 1999**

# Do You Have ATTITUDE?

When it comes to competing against the elite athletes of the World Wrestling Federation®, you better have attitude! Because these mat maniacs don't back down from any challenge. They don't fear any fight, and **WF ATTITUDE™** has more ways to battle than you ever dreamed of! If you want to challenge the best, you better bring something extra to the ring. It takes more than knowing powerful special moves and humiliating finishing moves. It takes more than a willingness to take on the crushing blows of the long and wrenching Career climb, or mad melees like Gauntlet, King of The Ring® or Cage matches. You need a certain pride, a certain arrogance, a deep feeling in your guts that you're the best grappler in the ring. You gotta be rude, crude and in the mood to feud: You need Attitude!

**A note about Gender:** Throughout this booklet, small effort has been made to make the text "gender neutral". You know, littered with "his or her superstar" and the like. If you're among the many females who love wrestling, you may have the great sense and good grace to pardon these lapses and realize that deep down, it's not simply about men or women or even someone like Goldust—it's about the joy of great big people beating up on other great big people! Thanks, man.

(Depending on the match type, you'll select the superstars you want to control, those the computer will control or have random ones assigned). Up to four players can select the same superstar, but be aware that the second selection will be considered an impostor. In Career mode, you select one superstar to guide through an entire season. In all other matches, Player 1 selects CPU\* superstars.

**\*Note: In case you were wondering, CPU is geekspeak for Central Processing Unit, the main brains of a computer. In this manual, it means a computer-controlled superstar.**

## CHOOSING CREATED WRESTLERS

If you've created and saved any wrestlers in Create A Wrestler (see page 19 for details), you can load them for use in any game mode. If you choose a Created Wrestler, you will go to the roster of saved wrestlers on your Memory Card where you can select which one you wish to bring into the ring. # CAREER

This mode is for the real wrestling fan, the kind of player who's not satisfied with simply beating a few frenzied freaks and calling it a day. In this mode, you go through an entire season, working up from a rookie in last place to winning the European Championship belt. After capturing that title, Career lets you continue to compete for the title in the Intercontinental division, and once that's earned, in the Heavyweight Championship division. By the time you've played through the Career, you're among the elite who can beat just about anybody! After you've beaten the CPU a few times, invite your friends over for a whipping, because this time around the Career can be played with up to 4 human players.

## ABOUT CAREER MODE

You begin at the bottom, an untested rookie ranked 20th. You'll start off where all rookies start off: House shows. As you prove yourself and begin to move up in rank, you can start to show your stuff on Shotgun Saturday Nights. If you keep winning, pretty soon, you'll find yourself flirtin' with the fans and TV cameras on Sunday Night Heat™ and Monday Night Raw™. Ultimately, your skilled superstar will be eligible to compete in the coveted monthly Pay-Per-View matches, where you have a chance to prove yourself before the most devoted—and demanding—fans in the world. PPV matches include fan favorites like In Your House™, King of the Ring™, SummerSlam™, Survivor Series™, Royal Rumble™, and of course the ultimate PPV, Wrestlemania™! Once you're ranked #1, your next PPV match will be for an awesome honor: the European Championship Belt! If you win the belt, you'll keep your #1 ranking, and then have to defend your belt to prove you're not a paper champion. Five successful title defenses will do the trick. You will then enter into the bottom (#15 ranking) of the Intercontinental competition, where reaching a #1 ranking ensures you a chance at the Intercontinental Championship belt. Say you've earned the first two titles. Feeling pretty good, starting to believe you can beat anybody right? Well take a breather, brother, because you've got to start another round of competition if you want to prove you've got the complete package it takes to win the top belt: the Heavyweight Championship belt! Think you can take all three? Good luck! Better hit the Training Room hard and often, amigo!

## FINE POINTS

**House, Shotgun and Heat matches** House shows are the beginning. Shotgun and Heat shows are televised but they don't include the same level of fanfare that a Raw or PPV would. These matches are worth 1 ranking point. They take place in smaller, less impressive surroundings. Hey, you gotta start somewhere, and for a beginner, that place is the bottom!

**Raw is War™** This is the great televised Monday Night show you love. There is a random chance this match will be a specialty match. This type of match is worth 1 ranking point.

**Pay-Per-View™** This is a special televised event. These matches have the most flash and include Superstar Intros. This type of match is worth 3 ranking points, so there's plenty on the line.

**In Your House™** Compete against fellow superstars in a grueling specialty match.

**King of the Ring™** This will be an 8 man tournament. This particular event doesn't end until the player has either lost 1 of the 3 matches or won all 3.

**SummerSlam™** Random match types include: Weapons Match, Cage Match, Triangle Match, Triple Threat, Stable Match or various other matches.

**Survivor Series™** Your regular superstar is teamed up with 3 other superstars to create a 4 man team to fight against an opposing 4 man team. If the player's team wins, his/her superstar moves up in rank, even if the player's superstar was pinned during the match.

**Royal Rumble™** This is a 30 person, last-one-still-in-the-ring-wins match. Players who win this match are automatically catapulted to a rank of 1st, earning them the right to wrestle for the belt at the next PPV, depending on the situation.

**WrestleMania™** This is a regular match. It is only played when a player is attempting to win the Heavyweight belt.

# The Multiplayer Career

In a multiplayer version, there is an initial War match to place players in slots from 20th – 17th for 4 players (the winner is ranked 17th). After that, each player in rank order fights in a House match against a randomly selected CPU or human player. Losers are deducted 1 rank and winners are advanced 1 rank. Shotguns are used to break ties. If there are no ties, they are treated like House shows. Raw matches are always 4 player War matches and worth 1 point to the winner and -1 to the losers. When a player is ranked 1st he must fight in a war match versus the other human players to prove why he is the number 1 contender. If he wins, he will have the chance to take on the multiplayer career champion for the Heavyweight belt. If that #1 ranked player loses, the player's ranking is deducted by 3. All other superstars advance 1 rank.

## TAG TEAM CAREER

The Tag Team Career is similar to the regular career mode, except all matches are tag matches, as your team battles to gain the Tag Team Championship belt. This match can be played with the players on the same team or on separate teams.

## Exhibition Mode

Choose from a range of different matches and get ready for fast action!

### VERSUS

This is the classic 1 on 1 match. Each player selects 1 superstar and they face off. The match continues until the rules set up by the player have been satisfied.

### TAG TEAM

Tag team is a match that requires 4 superstars. Under regular rules this match would end as soon as a Legal superstar has been pinned. 2 superstars are outside of the ring standing on the apron kitty corner from each other. It is a 2 man team with only 1 man being able to stay in the ring legally. The illegal superstar has to stay outside on the apron until he is tagged. Once the legal man tags the illegal man, their positions switch.

The illegal man can enter the ring, but only for a count of 5 seconds. When the 5 seconds are up, the illegal man must then exit the ring and stay back in his team's corner. This time meter will

slowly fill back up to 5 seconds. However, the illegal man is free to come into the ring at any time as long as there is some in-ring time left on his meter.

**To tag a teammate** Walk over to the superstar and press **L1** to face your partner and then press the **TIE-UP/PIN BUTTON**.

### 2 ON 1

In this mode, 2 players face off against a single foe. The individual superstar must fend for himself while the other two superstars are free to pummel at will. The teamed superstars are free to attack the single superstar as much as they like and are not restricted to a tag format. Under normal circumstances, the match will end when a superstar from 1 team has pinned a superstar on the other team. The disadvantaged superstar doesn't need to pin both superstars.

### 3 ON 1

If 2 on 1 is too easy for you, try 3 on 1! The rules are the same, but the odds are much worse!

### TORNADO

This mode features 4 superstars in the ring at once in a 2-on-2 match without tag team rules. The match ends when both people on one team have been eliminated. When 1 person is eliminated, the match becomes a 2-on-1 handicap match. The eliminated player can continue to wrestle outside of the ring on the floor, so beware!

### LUMBERJACK

In this mode, 2 players face off in the ring. There is a catch, however. Outside the ring are 2 CPU controlled superstars eager to pound any poor, unsuspecting superstar who finds himself outside the ring.

Select your superstars, then choose 2 CPU lumberjack players who stay outside the ring on opposite sides. The rules for the match are a cross between a VS. match and a Royal Rumble™. You can still pin like a VS. match but you also have the extra throw-over-the-ropes moves available in the Royal Rumble. The CPU superstars outside the ring do not interact in any way with the superstars inside the ring—as long as the in-ring superstars remain inside the ring and are careful not to find themselves within grabbing distance of either CPU superstar outside the ring!

Once the superstars inside the ring wander outside it, they better have their affairs in order! The CPU superstars outside the ring are just waiting to pounce on anybody that gets thrown over the ropes or is stupid enough to walk outside the ring. Both CPU superstars outside the ring will focus on anyone outside the ring. If more than 1 superstar is outside the ring, the CPU superstars will each pick a different opponent. The CPUs will beat on their opponent until they have stunned them or the opponent gets back into the ring. Once the opponent is stunned, the CPU superstars will throw the opponent back into the ring. CPUs have unlimited health and are always on 100 difficulty—really fair, eh? Ouch! This style of match will keep any crybaby opponent or annoying friends from constantly running away from you, as any player that gets close enough to the ropes risks being pulled out and stomped by the lumberjack superstars! Timber!

### **GAUNTLET**

In this mode, 2 players face off in the ring, but one opponent has a big advantage: one player is able to select a 4 man team! The player with a 1 man team must defeat all members of the other team. In a 1 player gauntlet, the user fights a CPU one-on-one until the CPU is eliminated. Once the user has eliminated his opponent, another superstar appears that the user must fight. This continues until the user has successfully beaten 4 CPU opponents!

### **TAG TEAM GAUNTLET**

This mode is similar to a regular gauntlet mode, but with a teammate. In this mode, the player and his/her teammate fight a teamed-opponent. As the enemy superstars are eliminated they are replaced with fresh teammates until all superstars on the enemy team have been eliminated. If both the player and his/her teammate are defeated before they defeat the enemy superstars, the match is over. Tag Team rules apply.

### **SURVIVOR SERIES™**

Only the STRONG survive! This mode is a Tag Team marathon match with 2 teams. Each team has 4 superstars and it's a fight to the finish. However, each team has his/her tag partner and 2 other teammates waiting in the wings. Whenever superstars are eliminated, they are replaced with the tag partner on the apron and a teammate waiting in the wings comes in to become the new tag partner. The match ends when there is only 1 team left.

### **ROYAL RUMBLE™**

The Royal Rumble is among the wildest spectacles in wrestling, a straight ahead free-for-all with no pins, no submissions, and no count outs! You can't even leave the ring and fight outside! It begins with 2 superstars grappling in the ring. Another superstar enters every 30 seconds. This continues until 4 superstars are in the ring at once. You eliminate opponents by throwing them over the top rope. Once a superstar is eliminated, another fills that spot, until all 30 superstars have been in the ring! When the Rumble is over, a stat screen will appear showing how many times you eliminated someone, how many times you were eliminated, and how much in-ring time you had. The winner is the last man in the ring. The Royal Rumble also lets you select superstars for all 30 superstar slots if you want.

### **BATTLE ROYAL**

The rules for Battle Royal are exactly the same as the rules for Royal Rumble with the following exceptions: all 4 players start in the ring at the same time and there are only 4 superstars. The match ends when there is only 1 superstar left in the ring.

### **WAR**

There are 4 superstars in the ring at once in a free-for-all style. The match ends when there is only 1 superstar left. Once a superstar has been eliminated, he/she is forced outside of the ring, but can still pull people out and beat anyone outside of the ring.

### **STABLE MATCH**

Like a War match, but each player has a team of 4 superstars. When a player gets pinned, his/her superstar leaves and a new one comes out until all his/her superstars are eliminated. The match ends when there is only 1 superstar left in the ring and all of the other team's superstars have been eliminated. Also, the last member of each team is allowed to remain outside the ring and fight with any other superstars outside the ring or superstars that he/she drags from inside the ring to outside the ring.

### **TRIANGLE**

This type of match is very similar to a Vs. match. Three people are in the ring at once in a free-for-all-format. The match ends after 2 superstars have been eliminated. The winner is the superstar that didn't get eliminated.

## TRIPLE THREAT

This match is similar to a Triangle match. The difference is that once a person has been eliminated, the match is over and the victory goes to the person who pinned or submitted the eliminated person. This type of match prevents double teaming.

## SOME SPECIALTY MATCH TYPES

In *WRESTLEMANIA*, you'll come across some truly brutal match types, which can show up at any time. Here's a taste of what to expect, besides a lot of yelling and whimpering.

### STEEL CAGE MATCH

The winner is the first superstar to climb out of the cage, usually leaving a helplessly beaten opponent lying on the mat below. If you think you can climb out to safety before your opponent is down, you'll soon have that faith shaken, friend, along with every bone in your body! The player can turn the Steel Cage on in Options before starting a match.

### WEAPONS MATCH

In a Weapons match, the rule book is just something to stand on to get a better view of the action! Just about any object can be used to punish your opponent. Your opponent will be thinking warmly of you, too, so be prepared to take on anything—including the kitchen sink! The player can turn weapons on in Options before starting a match.

## King of the Ring™

In this mode, the superstars face off in regular Vs. matches in a playoff-style tournament. If a player wins, he/she advances to the next tier. The mode is complete when there is only 1 superstar left. On the Options screen before each match the players can choose to watch the match or simulate a winner. Simulating a match will return the player to the tournament screen, with the winner advancing. Up to 8 human players can compete in King of the Ring tournaments. Player 1 will select all of the superstars. All players will wrestle using Controllers 1 and 2.

## Pay-Per-View

Want to relive some of the greatest wrestling matches ever broadcast? Ever wanted to create the perfect wrestling ticket? "Create your Own Pay-Per-View" mode is for you! In this mode you get to build a Pay-Per-View from the ground up. You can pick the name of the event, select the colors of the apron curtains—even choose between a House arena and a Pay-Per-View arena! You can also pick the type of matches for the Pay-Per-View, select the superstars who will participate in the Pay-Per-View and determine which superstars face which superstars—you're the big shot now!

## LENGTH SETTINGS

From Upper Shirt and/or Lower Pants, you will be able to adjust sleeve and pant lengths to get that all-important  $\frac{3}{4}$  length look that's so IT this year. To access the length meter, press the **Y** **BUTTON** twice (the first press highlights the color settings), then press **←** or **→** on the **DIRECTIONAL BUTTON** to raise or lower your hems! Ooohhh!

## ADDING TEXT TO CLOTHES

When Text is highlighted on the **CREATE MENU**, press the **X** **BUTTON** to bring up the text editing screen. Select an area you wish text to appear on and press the **X** **BUTTON**. You'll come to the text input screen. Press the **X** **BUTTON** on a selected line to access the text input window, then use the **DIRECTIONAL BUTTONS** to highlight desired characters and the **X** **BUTTON** to input a character. When text is complete, highlight **NEXT LINE** and press the **X** **BUTTON**.

**Text options** You can choose a large or small font and vertical or horizontal text alignment under Options. Press the **Y** **BUTTON** to access the options area, then use the **DIRECTIONAL BUTTONS** to highlight your choice. Press the **X** **BUTTON** to confirm. You can set text color by moving the slider. Press the **Y** **BUTTON** to return to the body area menu. You can also change the text color and which layer of clothing the text appears on.

## Attributes

You assign your creation varying degrees of five attributes (from 1 to 10), with the total equal to 36. Common sense suggests you create a superstar with balanced attributes, heavier in some areas, lighter in others, but have fun experimenting by creating creatures with, say, plenty of strength but no endurance, or lots of recovery but no speed. You're sure to find their resulting performance entertaining!

The attributes are:

**Strength** Affects damage you deliver.

**Toughness** Makes you less vulnerable to low-damage attacks like punches and kicks.

**Speed** Impacts walks, blocks, dodges, climbing the Turnbuckle and Cage.

**Recovery** Initial recovery value is lower, plus it lowers your chance of getting stunned.

**Charisma** Increases the chances of getting the crowd on your side. A happy crowd pumps you up so you do more damage.

**Mat Skills** Improve your ability to reverse moves and do more damage during holds.

## MOVES

You can choose which moves you want your custom superstar to have for particular situations, and there are plenty to choose from! To edit a move set, move the highlight to Finisher, Trademark or one of many, many Damage moves (arranged by the level of damage they do). Press the **X** **BUTTON** to highlight the moves window at the lower left of the screen. Press **←** or **→** **DIRECTIONAL BUTTONS** to toggle through the different situations, and **↑** or **↓** to scroll the moves available for each situation. Notice that button combinations for each move appear in the window at the lower right. When you've selected your move for one category (say, your Finisher), press the **△** **BUTTON** to get back to the move set selection menu and continue until you've got an arsenal of moves that will make your opponent cry "Uncle!"

**Names** Enter your own, or choose a selectable Name — You can select from a heaping helping of ring-tested names. When a player uses this superstar in the game, the announcers will refer to the superstar by the name he selected in the custom room.

## Utilities

Utilities offers a host of gaming options, plus a separate Controller Configuration screen. The main utilities screen offers you these choices:

**Control Config** See next page for details.

**Save Options** Access your Memory Card to save option settings.

**Difficulty** Select among Easy, Medium and Hard skill settings.

**Intros** Choose to play with or without the **SuperStar** intros.

**Recovery** Superstars will regain health during a match (ON) or not (OFF).

**Stereo** Play with Stereo or Mono sound.

**FX Volume** Turn sound effects OFF, or choose among Low, Medium and High settings.

**Music Volume** Turn the music OFF, or choose among Low, Medium and High settings.

**Blood** Play with festive blood (ON) or don't (OFF).

**Language** Choose ON or OFF. When ON, the censor hides some of the game's **ATTITUDE**.

**Name Meter** Select among ON, OFF and HEALTH COLOR. I for one don't get it.

**Damage Meter** Turn this meter ON or OFF.

**Tie-Up Meter** Turn this meter ON or OFF.

**Health Meter** Turn this meter ON or OFF.

## CONTROLLER CONFIGURATION

Take a look at the default settings, or change them to suit your style. All of the players can change their configuration at the same time. Player 1 has control over entering and exiting the screen. Each player just needs to highlight a control and then press the button he/she wants to use to do that action. When each player is done, he/she presses the Done button and presto!—the changes are saved.

## MATCH STATISTICS

At the end of each match the game will compile statistics about the match that was just fought, including the winner, match length, a moves chart that tells how much you're using specific moves from each category. A second screen details pin attempts, total damage and plenty more!
