Battle Under the City Streets

In a realm not traveled by the common man exists a strange and compelling arena. A world where the warrior is king and each fighter contends for the most sought after prize of them all - the crown of the Champion.

Choose between three Pit-Fighters, each with a deadly specialty that can take you to the top! Buzz - a former Pro Wrestler with a grip of iron and a Killer Body Slam! There's Ty, a hero of the Kickboxing circuit and a veteran Pit-Fighter. He has the Flying Deadly Double Kick.

Last, but not least is Kato, Master of the Flying Dragon style of Karate. With his incredible speed and agility, he delivers the Lethal Dragon Punch! All of these warriors have a shot at the current champ and its going to take all of your skill and determination to get there!

Starting the Match

Place the Pit-Fighter game pak in the Super Nintendo Entertainment System and turn the machine on. Press the Start button when the title page appears. This brings up the player select screen. This is where you choose between Buzz, Ty and Kato as your character. Each have strengths and weaknesses that you'll need to learn to master the game.

Once you have decided which warrior to take into battle, press the Select button. This takes you to the beginning of the first match.

Starting the Match *cont.*

Press the following buttons individually for these results:

A button - Use to throw a punch.

B button - Use to kick.

X button - Use to jump up.

Y button - Use to block an attack.

Control Pad (arrows) - Moves character back and forth.

Start button - Use to pause/unpause the game.

The buttons can be used in combination with other buttons and/or the control pad for a variety of effects:

A + Up arrow - Lifts enemy.

B + Down arrow - Makes character duck down.

B + Up arrow - Launch a jump kick.

X + any arrow direction - Jump away from enemy.

Y + Left or Right arrows - Do a rolling cartwheel.

Controlling the Character

At the top of the controller are buttons labeled L and R. In regular game play, these can be used for kicking (L) and punching (R). When a player has accumulated Super Power (as shown to the right of SP in the score area), then pressing the L or R will cause the character to begin his special super move.

The player receives the Super Power after successfully completing a match. As long as the Super Power indicator is blinking, the character has a chance to use his special attack.

The Status Area

In the upper left corner of the screen is the status area for player 1. The data listed is the player's name (Buzz, Ty or Kato), his health, the score (in dollar amounts), Super Power indicator (SP), and an indicator for a Knockout Bonus (KO's).

The score indicator for player 2 is identical and in the upper right corner of the screen. The name and health of the opponent closest to each player is shown next to the player's status area.

Each player can receive full health when the scores of 50,000, 150,000, 350,000, and 600,000 are achieved.

The Matches

All regular matches continue until one of the combatant's health drops to zero. There are a total of ten regular matches. After every other match there's a Grudge Match. Three Knockdowns are necessary to complete a grudge match. All Knockdowns are recorded in the status screen of each player.

In a two player game, there is an elimination round after the tenth round of regular matches is completed. Only the surviving player (Player-1 or Player-2), goes on to challenge the current title holder, ULTIMATE, in the Championship Match!
