# PLAYING A NORMAL GAME

## Story

Far to the north of Bomberman's hometown, Peace Town, lies the modern metropolis Diamond City. There, the evil Carat Diamond and his cohort, scientist Dr. Mook, are holding a Robot Tournament with robots specially designed for their combat and offensive capabilities. Hoping to steal Bomberman's advanced combat capabilities, Diamond has created a fake Bomberman to go to Peace Town and kidnap the real Bomberman. Aware of Diamond's plot, Black Bomberman heads out alone to face the fake Bomberman. But Black Bomberman is defeated and his castle is taken. Somehow Black Bomberman escapes and seeks refuge with White Bomberman, and warns him of Diamond's evil plan. Soon, wave upon wave of enemy robots begin their advance toward Peace Town. Now our two heroes must join forces to overthrow the evil Diamond!!

## Starting the Game

Insert the game cassette into the Super Nintendo Entertainment System™, and turn the Power Switch ON. When the Title Screen appears, use the Direction Key to select "Normal Mode" with the cursor, and then press the Start Button. This will start a Normal Game. Two players may play at once by pressing the Start Button on the 2-Player Controller after the game starts.

## The Game Screen

### Bomberman Stock

This shows the remaining number of Bomberman that the player has in stock. When this number reads "0" and the player loses the last Bomberman, the game is over. During a 2-player game, both players may continue by sharing lives as long as either player has remaining lives in stock.

### Score

The score increases as you defeat enemies and pick up items.

### Timer

If you cannot clear a stage before this timer runs out, you will lose one Bomberman.

## Continuing Gameplay

After a game is over, you can continue a game from the last stage reached by selecting "YES" on the Continue Screen and pressing the Start Button.

## Passwords

If you write down the 4-digit code that appears on the Continue Screen, you can continue the game from that point at a later time. To do this, select "Password" on the Title Screen with the cursor, and press the Start Button. The Password Input Screen then appears. Use the Up and Down buttons on the Control Pad to select the proper numbers, and press the A Button to start. If the password entered is valid, you can now continue the game in question by pressing the Start Button.

## Super Bomberman Rules

The Bomberman is armed with bombs.

Use these bombs to destroy enemies.

Find the hidden exit in the Soft Blocks (walls that can be destroyed).

Exiting through here after all the enemies are destroyed clears the screen.

But watch out! If your Bomberman gets caught by an enemy or an explosion you lose a life!

## PLAYING A BATTLE GAME

A Battle Game is a game played in versus mode that allows up to four players to join in. The setting for your battle can be freely selected from any one of 12 different stages. You can fight against other human players or the computer.

3 to 4 player games require the use of the Super Multitap™ and the use of any SNES controllers.

### Starting a Versus Game

#### • Starting the Game

1

On the Title Screen, use the Control Pad to select "Battle Mode" with the cursor, and then press the Start Button. The Player Select Screen then appears.

2

Use the Control Pad to select up to four human and/or computer players, and the skill level to use for computer players.

3

Next, continue down using the Control Pad and the screen will change. Here you can select the stage and number of battles to play. Press the Start Button to start the game.

4

The last Bomberman to remain alive wins one battle. The first player to win the number of battles selected on the Player Select Screen wins the game.

## Battle Game Rules and Playing Tips

In a Battle Game, players attack each other with their bombs. The last surviving player wins.

A draw game results if both players are hit by an explosion simultaneously.

Beware that the message "No Detonations" will appear if no explosions occur for a set length of time.

Watch out for the Skull Item. It limits Bomberman's capabilities for a set length of time.

The effect of the Skull Item will spread if an infected Bomberman touches an uninfected opponent.

### Mystery Item

The effects of this item are a mystery until you pick it up.

### Heart

Restores one BomberMan life.

### Skull

Causes one of the following unwanted effects: temporarily reduces speed, radically increases speed, lays bombs randomly, disallows laying bombs, makes BomberMan invisible, keeps laying bombs at high speed, or allows only one minimum-range bomb to be laid at a time.

## Playing Tips

Here's the unique usage of kicking and pushing bombs. You can stop a kicked bomb using the X or R button.

Some enemies cannot be destroyed by hitting them with a bomb just once. Destroy these enemies by combining kicks or pushes with explosions.

A pushed bomb will reappear on the other side of the playfield when it crosses a screen border.

Any enemy hit by a kicked or pushed bomb will sustain damage.
